PRODUCT STORY

Give your skin a little extra love with this Hypoallergenic White DHA Bronzer. The White DHA Bronzing Blend delivers natural golden results, while allowing for deeper, delayed color. Soothing Skincare lavishes skin with hydration and antioxidants to soothe and fight free radicals for the ultimate glowing complexion. **Enhanced Ink-Drink™ Complex** helps soften skin and moisturize tattoos for vibrant ink colors, while Intense Moisture Blend helps seal in moisture for longer lasting color results. Get it all and be worry free!

“My hectic schedule often means stressed and sensitive skin. This pure and simple formula delivers amazing results with luxurious skin-loving ingredients for when your skin needs a little more attention! Xoxo”

JWOWW – Jenni Farley

COLOR TECHNOLOGY

White DHA Bronzing Blend: Annatto contains beta carotene, a natural colorant, that helps induce skin pigmentation for immediate bronze perfection. A high level of clear DHA is blended with Erythrulose for an even application and gradual color development up to 24 hours after tanning session.

SKINCARE TECHNOLOGY

Soothing Skincare: Versatile skincare blend of Babassu Oil and Tamanu Seed Oil helps to provide deep hydration, while improving skin’s moisture barrier; contains powerful antioxidants and fatty acids which provide protection from external stressors for a youthful, smooth complexion.

Enhanced Ink-Drink™ Complex: From her original complex, Shea Butter, rich in Vitamin A and E, helps neutralize free radicals while also softening and moisturizing skin, while Raspberry protects the brilliance of tattoos by reducing tattoo color damage. Now enhanced with Cupuacu Butter that helps provide soothing and smoothing benefits while hydrating for more vibrant ink colors.

Intense Moisture Blend: Powerful combination of a humectant and emollients, including Murumuru Seed Butter, that helps draw and seal in moisture to rehydrate skin for a smooth, silky feel and allows color development to last days longer.

AVAILABLE SIZES

13.5oz Bottle | .5oz Packette

ADDITIONAL INFORMATION

This formulation undergoes additional required testing to ensure it’s perfect for sensitive skin tanners.
