Australian Gold® Lotion Types

**Bronzing Technology**
Australian Gold® utilizes different categories of bronzers, each designed to deliver a unique result, all leading to unsurpassed color enhancement. Each product has a different combination of several bronzers at various levels. As a tanner moves up in price point, the level or dimension of bronzers gets stronger and higher. This ensures a tanner can achieve remarkable color at any price point level.

**Natural or Immediate Bronzers**
This technology uses natural based extracts to provide immediate color to the skin that lasts one-to-two days. Examples of natural bronzers include Walnut Shell Extract, Caramel, Henna and Melanin. These natural extracts are considered cosmetic bronzers because they add additional color to the skin, much like cosmetic make-up.

**Delayed Bronzers**
This technology uses the self-tanning agent, DHA, to increase dark color. Erythrulose is often used in conjunction with DHA. Both are sugar cane extracts that chemically darken the protein in the skin, the more DHA used the darker the shade of brown. The color typically lasts four to seven days and is seen within two-to-four hours after application. Hand washing is required with the use of DHA tanning lotions.

**Melanin Enhancing Bronzers**
Melanin enhancing bronzers are the newest technology in color enhancement. These bronzers break tradition with an advantageous twist of a self-tanner based on stimulation of melanin biosynthesis. These are streak-free and do not wash off the skin because the color is a natural tan of the skin, but at the darkest tone possible. Melanin enhancing bronzers can be used alone or with Natural or Delayed Bronzers and do take longer to create color, but last longer and are much darker.

Melanin Enhancing Bronzers are designed to be low maintenance, enhance darker natural color and maintain the bronze hue longer.
**Tingle**

Test small area before application. This product causes a reddening and tingling or warming sensation. A base tan is recommended before use. Not intended for sensitive skin. Not intended for facial area. Not intended for outdoor use. Extra care should be taken when handling children and pets as the reddening effect could be transferred to skin even hours after use.

Tingle products are for advanced tanners who like to experience a warming sensation during tanning and see a reddening effect on their skin after tanning. These products are not recommended for sensitive skin tanners. These products should never be used for outdoor tanning.

Tingle products are available in a range of intensity from Tingle 2 to Tingle 40, the higher the number the more intense the tingle. First time users should start with the lowest tingle and work their way up to stronger tingles when they are comfortable.

Tingle is Benzyl Nicotinate which stimulates and increases microcirculation of the skin causing reddening appearance and a warming effect on the skin as a result of the increase in blood flow. This is similar to the flush you feel when your blood flow increases when you begin exercising. The increased blood flow increases the oxygen level in the skin, which aids in the delivery of required nutrients.

Tingle causes a temporary skin response. The duration of the effect depends on the intensity of the ingredients and the sensitivity of each individual’s skin. The tingle response initiates fairly quickly (within 5 minutes) once the product is applied and will last anywhere from 20 minutes to a few hours.

Testing a small area before application is mandatory. Do not apply to face. Tingle products should be applied to the skin immediately prior to tanning. Wipe or wash hands after use. Do not touch eyes or sensitive areas of the body. Showering is not recommended for four hours after use. If skin needs cooling after use, Australian Gold® Aloe Freeze Gel with Lidocaine is recommended.
Accelerator K™

**Benefits:**

**Triple Carrot Blend** combines Carrot Oil, Carrot Water and Carrot Root Extract to help support, nourish, and soften for undeniable golden result.

**Biosine Complex®** is an advanced combination of ingredients that soothe, soften and moisturize for maximum tanning results.

3D Protect Technology Designer Skin® scientifically designed complex. 3D Protect Technology creates the trifecta of healthy skin in 3 ways: 1. Creates a barrier on the skin to lock in moisture 2. Features advanced compounds which help promote skin cell regeneration 3. Uses broad spectrum antibacterial ingredients that instantly cleanse the skin.

3. Uses broad spectrum antibacterial ingredients that promote bronze color, rich in phytosterols, anthocyanins, essential fatty acids and vitamins.

Acacia Senegal Gum This ingredient comes from the African grassland savanna. It is the dried gum of the acacia and used as a thickener in lotions and other cosmetic products.

Acacia Senegal Extract Nutrient-rich moisturizer native to Australia. It is said that ancient Moors of the desert could sustain themselves for 24hrs after eating only 6oz of Acacia.

Acacia Oil Promotes bronze color, rich in phytoestrols, anthocyanins, essential fatty acids and vitamins.

Adenosine-5-Triphosphate This ingredient, also referred to as Adenosine-5-Triphosphate, is a coenzyme valuable in the transfer of phosphate bond energy and is used as a cell function energizer. It is an ingredient in TRF and Vitatan.

Advanced Moisture Complex™ Designer Skin® scientifically designed complex, provides ultimate hydrating nourishment to skin, moisturizes on a dermal level.

Agave Americana “Agave,” derived from the Greek word meaning “admirable” or “noble,” is a member of the lily family and is not a cactus plant, as many commonly believe. It provides anti-inflammatory and skin soothing benefits and is used as a moisturizer in cosmetic products. It is enriched with many skincare concentrates and nutritive vitamins. (Note: The only species of Agave...
INGREDIENT GLOSSARY

**INGREDIENT GLOSSARY**

Skin-conditioning agent, skin protectant. Used to help heal wounds and skin ulcers and to stimulate the growth of Healthy tissue. It is a soothing, softening and calming substance. It is non-irritating and emollient. It is odorless, leaves no trace and it inhibits the proliferation of certain bacteria. It can be used in cosmetic preparations as a base or acid, allowing the combination of different substances and producing preparations with useful dermatological properties.

**Almond Oil (Prunus amygdalus dulcis)** Almond Oil is rich in vitamins and exceptionally good for dry and chapped skin. Almond Oil has properties to effectively augment the lipid barrier and reduce transepidermal water loss for increased hydration. Helps restore skin vitality and its natural emollients are known for softening the skin and promoting a clear young looking complexion.

**Aloe Barbadensis Leaf Extract** The extract of the leaves of the aloe, Aloe Barbadensis. Also known as Aloe Vera. Aloe Vera is used in cosmetics in many different forms. It is an extract from the leaves of the Aloe Vera plant that is purified, stabilized and often made into a powder form, which is more concentrated than the liquid extract. The powder can be dissolved in solvents, such as water or glycols, to make it into a gel form. It has excellent healing, soothing and moisturizing effects to the skin.

**Algae Extract Special Blend** A concentrated extract from selected marine algae and the inner-gel of aloe containing numerous nutrients, conditioning agents and known healing agents. Aloe Benefits: A source of over 130 different constituents; excellent anti-inflammatory, calming, soothing and healing agent for dry, chapped skin that has been exposed to environmental stresses, including elements of sun; helps skin to receive moisture and nutrients; aloe is a rich source of essential oils, carbohydrates, proteins, vitamins, enzymes, minerals and amino acids which act synergistically to help repair and rejuvenate skin; its known healing power comes from helping to increase the availability of oxygen to the skin and by promoting the increase of the synthesis and strength of tissue; rich in Vitamin C.

**Alpha Lipoic Acid** Ultra powerful antioxidant, works synergistically with other antioxidants in the skin.

**Alpine Lichen Extract** Algae found in North American forests that has many beneficial applications and is used in several countries. Alpine Lichen contains a dextro-rotary of Usnic Acid, which is a powerful antioxidant known to help soothe the skin. Usnic Acid is also known to have deodorizing properties.

**Alteromonas Ferment Extract** This extract is synthesized by a living microorganism found in the darkest depths of the oceanic abyss, 3000 meters down and at an atmospheric pressure of 300 bar. The extract soothes, repairs skin damage and reduces the irritability of very sensitive skin.

**Aluminum Starch Octenylsuccinate** Anti-caking, binder, film former.

**American Beauty Rose** Skin conditioner that provides radiance to skin.

**Amla** Skin conditioner that provides moisture, softening and toning; and promotes the proper condition for deep dark tan color.

**Algae** Freshly harvested from Pacific waters; rich in minerals, vitamins, enzymes; uronic acids from the algae form a protective hydrating film on the skin, entrapping the nutrients, conditioning agents and healing agents of both Algae. Algae can help the process of keeping active ingredients in contact with skin for an extended period of time. This process promotes skin soothing and anti-wrinkle, anti-aging properties.

**Algae Extract** An extract from Brown Algae, which is also called Laminaria Ochroleuca, this ingredient is a marine plant that lives exposed to intense light. The extract is rich in plastoquinones that are players in the photosynthesis process. This particular algae extract acts as a suntan stimulator when exposed to UV radiation. It also stimulates the activity of tyrosinase.

**Algotan** Helps increase melanin production.

**Allantoin** Skin-conditioning agent, skin protectant. Used in cold creams, hand lotions, hair lotions, after-shave lotions and other skin-soothing cosmetics because of its ability to help heal wounds and skin ulcers and to stimulate the growth of healthy tissue. It is a soothing, softening and calming substance. It is non-irritating and emollient. It is odorless, leaves no trace and it inhibits the proliferation of certain bacteria. It can be used in cosmetic preparations as a base or acid, allowing the combination of different substances and producing preparations with useful dermatological properties.

**Apricot Kernel Extract** (Prunus armeniaca kernel extract) Extracted from apple fruit; rich in natural antioxidants such as tocopherols; acts as free-radical scavenger which protects DNA from damage; helps to smooth the cutaneous relief and visibly reduces the formation of wrinkles; re-establishes the protective and moisturizing film after tan; and helps increase skin firmness and toning.
Ascorbic Acid (Vitamin C) Helps increase melanin production for a faster tan development.

Bare All Blend Designer Skin® exclusive technology allows instant color to spread evenly on skin for a flawless finish with results appearing more vibrant.

Barley Extract (Hordeum distichon extract) Highly rich in proteins; rich in long chain hydrocarbons, phospholipids, glycolipids and Triglyceride; helps reduce Trans-epidermal Water Loss (TEWL) for increased skin hydration and improved skin suppleness. Effective agent in promoting skin barrier repair and helping skin be more resistant to dryness by retaining moisture.

Beach Blush A light touch of tingle to excite skin. A warming sensation boosts tanning experience and a blush hue deepens color results. Enriches skin with oxygen for even darker color development.

Beauty Blend® Contains natural oils, Olive, Sunflower, and Tea Tree, for skin conditioning and intense moisturization.

Beet & Berry Smoothie Scrumptious blend of Beet and Raspberry Extracts that provide the skin with antioxidants and Vitamins that help to improve skin tone and combat free radicals for a dazzling appearance.

Beet Root Extract See Beta Vulgaris Root Extract.

BelezaBronze® Helps increase melanin production for a flawless golden glow.

Benzenophene-4 This benzenophene derivative is used as an ultraviolet light absorber to give a longer shelf life to products.

Benzyl Nicotinate This ingredient imparts a warm, “tingling” effect on the skin by increasing microcirculation, which causes the skin to flush. The red flushing that occurs is due to the increased blood flow to the skin and will add color, making a tan immediately appear darker. This effect, coupled with the color generated in the well-documented immediate pigment darkening reaction (IPD), will yield a more intense appearing tan.

Beta Carotene Ingredient comes from dark green leafy vegetables and dark yellow/orange fruits and vegetables. It is converted to Vitamin A in the body.
Researchers are now looking at beta-carotene as an antioxidant vitamin in preventing cancer and cardiovascular disease.

**Beta Vulgaris Root Extract** This extract is from the roots of the beet. It is used in cosmetic products as a skin-conditioning agent and also to impart color to the finished formulation.

**Black & Blue Blend** Indulgent concoction of Black Tea and Blue Passion Flower Extracts that purify, restore and nourish for a longer-lasting bronze hue.

**BioBronze® Blend** A proprietary Swedish Beauty Botanica® blend of natural botanical ingredients that significantly enhance tyrosinase, which is the kick-start for providing immediate rich color. It is also a rich source of Vitamin C with strong antioxidant properties. BioBronze® helps to activate tan color to achieve even darker hues than could previously be reached with the current bronzing system. BioBronze® Blend is used in all categories of lotions without making them a bronzer.

**Biocide® Antibacterial Formula** A revolutionary ingredient designed to reduce after tan “odor.”

**Biodynes® 03** Biotechnological ingredient that offers DNA protection, lipid barrier protection and repair, free radical protection and protection from antioxidants. Offers a new definition of skin protection called the “Ozone Protection Factor” (OPF) that protects DHA and its metabolites against the effects of UV radiation and chemical oxidants.

**Bioflavonoids (Vitamin P Complex)** Extremely powerful antioxidants. Citrus-flavored compounds needed to maintain healthy blood vessel walls. Widely distributed among plants, especially citrus fruits and rose hips. Usually taken from orange and lemon rinds and used as a reducing ingredient. Bioflavonoids assist Vitamin C in keeping the intracellular cement collagen in healthy condition.

**Biosaccharide Complex** Also known as Fucogel or Biosaccharide Gum-1, this biologically produced blend of polysaccharides is used in tanning products for its anti-odor and double hydration properties. Biosaccharide Gum-1 binds with bacteria instead of binding to the skin and causing the “after-tan” odor. It is also able to retain water in the same manner as hyaluronic acid, a very popular and efficient humectant commonly used in cosmetics.

**Biosine Complex Blend** Advanced dark tanning blend.

**BioTanning® Blend** Biotanning® is an active ingredient rich in citrus flavonoids (hesperidin) that speeds up skin pigmentation by stimulating the activity of tyrosinase and the synthesis of melanin. It is a tanning catalyst.

**Bitter Orange Flower Extract** See Citrus Aurantium Amara Extract.

**Bixa Orellana (Annatto) Seed Extract** A red seed pigment produced by the Annatto plant. The seeds and pulp of the Annatto plant feature a natural brown and red tint that instantly provide rich, golden color to skin.

**Black Currant Seed Oil (Ribes nigrum seed oil)** Rich in polyunsaturated essential fatty acids particularly in Gamma Linolenic Acid (an Omega-6 Acid) which is a remarkable substance for skin rejuvenation benefits; helps maintain water impermeability; assists in reduction of skin inflammation; and promotes deep dark tan color.

**Black Truffle Extract** Helps improve overall skin appearance. Rich in polyphenolic compounds and essential minerals. Known for its natural occurring high concentration of tyrosinase. This blend helps increase melanin production, which is a pigment –up skin pigmentation by stimulating the activity of tyrosinase and the synthesis of melanin. It is a tanning catalyst.

**Black Truffle Extract** Helps improve overall skin appearance. Rich in polyphenolic compounds and essential minerals. Known for its natural occurring high concentration of tyrosinase. This blend helps increase melanin production, which is a pigment –up skin pigmentation by stimulating the activity of tyrosinase and the synthesis of melanin. It is a tanning catalyst.

**Blue Lotus Extract** Antioxidant that protects against oxidative stress and restores balance in skin.

**Blueberry Leaves Extract** Antioxidant that protects against oxidative stress and restores balance in skin.

**Black Tea Extract** Detoxifies and protects skin.

**Blueberry** Rich in Vitamins C and K, Blueberry can act as a skin-conditioning antioxidant that can neutralize free radicals generated by radiation; very useful in the treatment of photo aging.

**Blue Lotus Extract** Antioxidant that neutralizes free radicals and protects cells against environmental damage. Helps improve skin elasticity and firmness, moisturizes while it calms the skin.

**Blue Passionflower** Assist in softening and healing the skin for a more youthful bright appearance.

**Body Bling Blend** Precious-gem blend featuring finely-milled Diamond, Opal, Mother of Pearl, and Turquoise. It delivers bio-available minerals to the skin important for formation of electrolytes, which act as skin balancers.

**Body Blush Blend** Active ingredients react synergistically for an immediate photo-reactive blushed glow, without warming the skin. The blend increases circulation of red blood cells. Increased circulation produces more oxygen at the surface level to cause faster, darker color.

**Boho Glow™** Swedish Beauty® exclusive ingredient. Boho Glow™ is a combination of DHA, Copper, found in Sea Salt, and Caramel. Copper helps aid in Melanin synthesis, and Caramel will give gleaming bronze color immediately.

**Boosted BioBronze® Blend** Swedish Beauty® exclusive ingredient. Tropical Fruit Smoothie of Cocoa, Orange, Angelica Root and Banana extracts enhance natural dark color.

**Botanessential AD 24** See Pyrus Malus

**Botanical Antioxidants** Botanical source of naturally occurring antioxidants.

**Breakthrough Fragrance Technology** Eliminates odors at the source leaving only fresh fragrance behind.

**Brij 30 (Laureth-4)** Surfactant, emulsifying agent.

**Brilliant Desert Complex** Harnesses the power of the Australian desert with Brilliant Hop-Bush Extract and Desert Honey Myrtle Extract that help soothe and nourish skin promoting a gorgeous overall glow.

**BronzeActive™** An atomic compound that activates dormant melanocytes to maximize tanning potential and help develop dark color.

**Bronzers** Enhance process by imparting additional color to the skin via immediate cosmetic bronzers. Deliver darker immediate color.

**Bronze Shock Blend** Designer Skin® exclusive technology provides dark color with a custom blend of sunless agents, vibrant Red and Violet hues, and DHA that work to impart immediate results as well as color development that starts as soon as tanning begins and gradually building for hours later.

**Bronze Struck Blend™** Designer Skin® exclusive technology features a patented combination of DHA
2020 Ingredient Glossary

and Erythrulose, fortified with Opal, to give lustrous, flawless dark color and longer-lasting results. **Bronzeurphoria Complex™** Designer Skin’s exclusive technology features an opulent fusion of Caramel and Minerals, enhanced with Tyrosine. **BRONZEXTEND® Blend** Adds a potent touch of DHA and Erythulose to gradually develop rich bronze color. **Bronzing Complex™** Combination of colorants with DHA sunless Tanner for extra color that is fully noticeable within 12 – 24 hours and lasts 4 – 7 days. **Bronzing Matrix™** Combines unparalleled bronzing power with stamina-enhancing potency for a long-lasting, gorgeous glow. **Bronzing Power Boost** A high level of specially combined bronzing ingredients, both delayed and immediate, ensure ultra dark color. **Bronzing Power Cling** A high level of specially combined bronzing ingredients, both immediate and long-term, ensure dark color with optimal absorption, while a thin layer forms on skin to keep cosmetic color from smearing or fading. **Brown Algae Extract (Kelp)** Kelp is a large seaweed belonging to the class of Brown Algae that is most abundant along rocks of coastal areas. It binds moisture to the skin and has a high concentration of antioxidants. Brown Algae Extract contains over seventy minerals and even some trace elements. **Brown Sugar** A natural source of Glycolic acid, this sugar can lead to the appearance of healthier, younger looking skin. **Calendula** See Calendula Officinalis Extract. **Calendula Officinalis Extract** This is a biological ingredient derived from the Pot Marigold plant, which is native to Europe. The extract, derived from the plant’s flowers, provides soothing effects and helps heal damaged or irritated tissues, reducing inflammation. It is also used in products for eczema, athlete’s foot, varicose veins, minor injuries and skin problems. **Cali Bronzing Blend** Offers intense, dark cosmetic color to deliver the best complexion yet. This blend is known to help accelerate cell turnover rate, which can lead to the appearance of healthier, younger looking skin. **Cali Collection® Blend** A unique combination of ingredients that help keep skin looking young. **Camellia Sinensis Leaf Extract** This extract has natural anhydrous caffeine extracted from green tea leaves rich in antioxidants and aids in neutralizing free radicals to help prevent cellular damage. **Camu Camu Fruit Extract** Natural source of Vitamin C, Camu Camu Fruit Extract is a tremendous antioxidant inhibiting free radical damage to the skin. This fruit of an Amazonian tree, is rich in Vitamins A & C and promotes gorgeously dark color. **Capsicum Frutescens (Chili) Fruit Extract** Derived from Cayenne Pepper it works like tingle to stimulate blood flow to the skin producing darker, immediate results. **Carrot Oil** Natural color enhancer. **Carya Illinoensis (Pecan) Seed Extract** An excellent source of Protein, Zinc, Vitamins A and E, Folate and Phosphorus that play an important role in maintaining perfect skin. Zinc helps prevent against infection and promotes a clear complexion, while Vitamins A and E fight and eliminate skin aging. Thus, Pecans can help prevent the occurrence of fine lines, wrinkles and hyperpigmentation. **Cashmere Extract** Repairs surface damage, enhances the surface moisture content, coats skin smoothly and has moisture retentive properties; all acting to provide healthy, glowing skin. **Cationic Protein** Collagen-derived cationic proteins perform as highly-functional skin-conditioning agents. **Caviar Complex** Blend of two caviars helps improve the state of dry and mature skin and promotes suppleness, smoothness and radiance to the skin tone. **Caviar Extract** Excellent source of minerals, proteins, amino acids and Vitamin A and D; helps improve the
Also known as Anthemis Nobilis
Emollient, opacifier and skin-conditioner.

Cetyl Alcohol
Emollient, skin conditioner.

Cetearyl Alcohol
This mixture of fatty alcohols
is used as a viscosity-increasing agent in skin care products.

Ceramide
A natural substance within the skin that reduces natural water loss of the skin by forming a protective barrier.

Certified Aloe Vera
See Aloe Vera

Ceteareth-20
Carrier, dispersant and emulsifier.

Cetearyl Alcohol
This mixture of fatty alcohols consisting predominantly of Cetyl Alcohol and Stearyl Alcohol is used as an emollient and viscosity-increasing agent in emulsions.

Cetyl Acetate
Emollient, skin conditioner.

Cetyl Alcohol
This fatty alcohol produced from palm and coconut oil is used as an emulsifying agent, viscosity-increasing agent and emulsion stabilizer in cosmetics.

Cetyl Dimethicone
Emollient.

Cetyl Palmitate
Emollient, opacifier and skin-conditioner.

Chamomile Extract
This extract is a natural ingredient used as a soothing agent and anti-inflammatory ingredient. Chamomile flowers contain lipids consisting of fatty acids, such as linoleic acid, oleic acid, palmitic acid, stearic acid and cerotic acid. Several of these fatty acids comprise the protective barrier layer of the skin. Chamomile has soothing as well as free radical scavenging properties.

Charcoal
This ingredient helps to detoxify skin by gently lifting away impurities for an instant brightening effect. Acting like a magnet to remove dirt and oil from contact with skin, it works to provide a deep cleanse for pores.

Cherry Extract
Antioxidant-rich to defend and protect nearly all cell types. Tightens, tones and calms skin.

Chicory Extract
Natural color booster, bronzer.

Chlorella Vulgaris
Natural color booster, bronzer.

 Coconut Water
Hydrates skin and decreases excess oils making skin look soft and supple.

Cocoa Butter
Obtained from the roasted seeds of Theobroma Cacao, Cocoa Butter is used as an excellent moisturizer and skin protectant to nourish and soften skin. It is also used to help speed the healing of damaged skin, to smooth blemishes, to soften stretch marks and to soothe itching from insect bites and rashes.

Coffea Arabica Extract
This ingredient is extracted from the fruit of the coffee tree. Green Coffee has antiseptic properties due to its content of phenolic acids (parahydrocinnamic, ferulic and chlorogenic acids). It can be used as an antioxidant in sun and slendinizer products.
Coffee Bean Extract Also known as Coffea Arabica Extract, this ingredient is extracted from the fruit of the coffee tree. Green Coffee has anti-septic properties due to its content of phenolic acids (parahydrocinnamic, ferulic and chlorogenic acids). It can be used as an antioxidant in sun and slenderizing products.

Coffee Butter Energizes skin for better performance while promoting a smoother finish.

Collagen The main and most abundant protein found in skin, responsible for skin strength and elasticity, its degradation leads to wrinkles that accompany aging. Strengthens blood vessels and plays a role in tissue development.

Color Match™ Technology A custom blend of 6 ingredients that easily blend into any skin tone without blocking the effects of DHA found in the California Tan Sunless’ After Sunless Powder.

Color Bursting Beads Designer Skin' exclusive technology imparts immediate rich, dark color as beads meld onto skin for a dazzling transformation and optimal results.

ColorGuard™ Technology Tiger Grass or “Gotu Kola” is a highly concentrated active ingredient which stimulates the skin’s own collagen production, ensuring smooth, firm and soft skin. This herb also protects tattoos from fading.

Color Match™ Blend Compliments skin tone with subtle light reflecting elements to conceal minor imperfections and provide a radiant, balanced finish both in and out of the tanning bed.

Color Shifting™ Complex Designer Skin’ exclusive complex that entraps UV light to optimize tanning potential.

Comfrey (Symphytum Officinale) Comfrey is a plant that grows in humid places. It provides cosmetology with one of the most important vegetal ingredients, allantoin. Comfrey extract is simultaneously astringent and soothing. The therapeutic value of comfrey extract was discovered in 1912. While preparing comfrey extract, scientists observed the presence of shiny crystals. These crystals turned out to be allantoin. This explained its healing property. Comfrey extract directly improves the quality of skin care creams and lotions.

Contains allantoin, minerals, Vitamins A, C and E.

Competition Ready Bronzers Cosmetic color that remains on skin for 24 hours with minimal streaking and rub-off ensuring the integrity of the color the day of the competition.

Coneflower Extract (Echinacea angustifolia extract) Rich in polysaccharides, phenolic compounds; an antioxidant, anti-inflammatory and aniseptic agent; skin soothing and calming properties during and after tanning process.

Cooling Essence Bathes skin in refreshing and cooling essence, enhances sensory experience.

Copper Bio-Ferment Contains copper fermented with yeast to increase the bioavailability of copper to the skin that helps strengthen the bond between collagen and elastin allowing the skin to remain strong and durable.

Copper Gluconate See Skin Saver.

Cornflower Extract (Centaurea cyanus flower extract) Natural extract for skin soothing. Also used as a colorant or dye.

Costa Chic Blend Designer Skin’ exclusive technology contains Agave Extract with a fusion of moisturizing ingredients for a hydrated glow with a non-greasy, matte after-feel.

Crambe Abyssinica Seed Oil Provides natural luster and emollient cushion feeling to skin. Rapid penetration to provide excellent moisturization.

Cream Oil Formula Designer Skin’ scientifically designed complex. Creamy formula glides on instantly and evenly, drenching skin in moisturizing goodness. Pampers skin and keeps it feeling perfectly soft and smooth.

Crosil 10,000 (Hydrolyzed silk) Powerful moisturizer, film-former; binds to skin and imparts silky feel.

Crosspolymer/Dimethicone This ingredient is a silicone derivative in the form of a flowing 3 dimensional liquid. The material imparts a cushiony, slippery tactile property to cosmetic formulations. It gives skin a smooth silky finish and imparts excellent spreadability characteristics to creams and lotions.

Crushed Pearls Crushed pearls nourish and vitalize the skin with minerals and age fighting amino acids, delivering a healthy-looking glow and luster to the skin.

CT 3D® Different shades of Caramel and DHA provide multi-dimensional, personalized color. Infused with Colloidal Gold for a glamorous glow. Turmeric is known to increase antioxidant activity to calm inflamed skin and lock in moisture.

CT Protect™ Shields skins youthful appearance with nutrients to prevent damage.

CT Renew® Found only in the California Tan Sunless’ Practice Solution, a blend of ingredients that allows the instant glow from the Caramel to spray easily on the skin while loosely binding, giving the Spray Technician time to wipe off mistakes, yet when solution dries it will not smear or stain most clothing.

Cucumber Fruit Extract Also known as Cucumis Sativus Extract, Cucumber is native to the southwest of India where it has been cultivated for more than 4000 years. Cucumber, which has a high content of water, has moisturizing, purifying and refreshing properties. The fresh pulp has soothing properties and is therefore often used externally to treat superficial skin disorders, such as rashes or skin inflammations. It is commonly used in face creams for dry, sensitive skin and in after-sun products.

Cucumis Sativus Extract See Cucumber Fruit Extract.

CuO2 Copper peptides and oxygen blend to produce this exclusive California Tan’ ingredient. Both elements energize the skin and contribute to the production of tyrosinase, which plays an essential role in the production of melanin for dark tan development.

Cupuacu Butter Swedish Beauty’ exclusive ingredient. Prized for its taste and medicinal properties, Cupuacu Butter is a great natural emollient, quickly absorbing into skin. It is capable of absorbing over 4 times its weight in water, intensely moisturizing skin after UV exposure and providing softness without leaving a greasy after-feel.

Curticula Lunga Extract See Turmeric Extract.

Cushion Silicone Designer Skin’ exclusive technology drapes skin in a breathable, silky layer that hydrates while leaving behind a luxurious, cushioned feel and...
a flawless appearance.

**Cyclic AMP** This ingredient is a key intracellular regulator of a number of cellular processes and is found in most animal cells and in some higher plants. 

**Cyclomethicone** Cyclomethicone gives excellent spreadability characteristics to creams and lotions. See also Crosspolymer/dimethicone. 

**Cyclopatanisoloxane** Promotes a smooth application and refreshing finish to lotions. Emollient properties help impart a soft, silky skin feel. 

**Dark Abyss Elixir** Designer Skin® exclusive blend of DHA, Erythulose and a color enhancing agent that helps provide deep, dark color. Color progression is increased for development lasting up to twice as long for beautiful, long-lasting results. 

**Dark Bronzer Dark Double / Triple / Quatro / Quatro+ California Tan® exclusive blend of bronzing agents that are ideal for advanced tanners who want to intensify their existing tan with deep, dark, natural-looking color.** 

**Darkest Delight Color Elixir** Designer Skin® exclusive ingredient that contains Wild Indigo and Black Tea to highlight the darkest tones in the skin to enrich the beauty of a tan. 

**Dark Diamond Complex** Designer Skin® exclusive blend of Black Walnut, Wild Indigo and Caramel works to reflect skin with deep hues that naturally complement skin’s darkest tones for luxurious dark color. 

**Dark Duration Complex** Designer Skin® exclusive ingredient helps prep skin to go seamlessly from UV to Sunless tanning. Working to provide even tan development and a base that sunless spray will build upon, the blend helps to enhance sunless effects with streak-free results. 

**Deep Blue Technology** Designer Skin® exclusive technology features Turquoise to help complement immediate color, for ravishing, dark bronze results. 

**Defiance® Tanning Complex** Designer Skin® scientifically designed complex that contains an optimized blend of intensifiers, DHA and Erythulose to break through skin’s tanning plateau without discoloration or uneven color. 

**DermaDark® Blend plus Melanobronze** Induces melanin biosynthesis with increased pigmentation, even without UV exposure. Enhances bronze color while stimulating melanin formation. Easy maintenance and streak-free, color lasts up to 9 days. Melanobronze and the new Advanced DermaDark® ingredient actively stimulate the melanin production in melanocyte to enhance tanning capabilities. 

**Designer Glow Complex** Designer Skin® exclusive technology features pigments with natural gold hues and opalescent undertones for a multi-dimensional glow that helps to highlight skin for a radiant finish. 

**Dew Drop Ultra Moisturizer A Swedish Beauty® exclusive ingredient.** The hydrating power of Skin Silk and Cocoa Butter provide long-lasting moisture. High Vitamin E content in Cocoa Butter enhances skin renewal and repair. 

**DHA** See Dihydroxyacetone. 

**DHA Bronzers** See Dihydroxyacetone. 

**Ultra Pure DHA** Contains premium DHA, manufactured using a patented process and is of the highest available on the market when it comes to purity and quality. This insures the same result, quality and consistency, use after use. This ingredient is key in delivering the main formula objective: beautiful, balanced color. 

**Diamond Dust** See Diamond/Ferment Lysate Filtrate. 

**Diamond/Ferment Lysate Filtrate** Derived from crystallized modification of carbon and used as a luxurious, elegant additive. Crushed diamonds supply amino acids to the skin that have a nourishing, vitalizing and anti-aging effect. 

**Dihydroxyacetone** Often referred to as DHA, Dihydroxyacetone is an effective bronzer, or sunless tanning agent, that is widely used in cosmetic products worldwide. Unlike a UV-produced suntan in which the skin’s tanned appearance is the result of an increase in melanin in the skin, a sunless tan is limited to the upper layer of the skin and results from a reaction between DHA and skin proteins. The development of sunless tanning color takes anywhere from 2 to 4 hours and the intensity is dependent on the concentration of DHA in the formula. See also BRONZEXTEND® Complex. 

**Disopropyl Adipate** This ingredient is a clear, colorless liquid that is an excellent solvent for perfumes and aroma chemicals. It has a dry feel with no residue and absorbs quickly into the skin with no tacky after-feel. It is a major component in dry oil sprays. 

**Dimethicone** Dimethicone is a form of silicone that is widely used as a skin protectant to help treat and prevent dermatitis. It is also a skin-conditioning agent that helps reduce the evaporation of water from the skin’s surface. 

**Dimethicone Crosspolymer** A self-indulgent silicone that has been woven together to provide luxurious aesthetics. Forms a soft breathable layer on the skin that helps retain moisture and protect from environmental pollutants. 

**Dimethyl Isosorbide** This ingredient is used as a solvent of active ingredients. Dimethyl isosorbide is used with Dihydroxyacetone for more even skin distribution to prevent streaking. 

**Disodium EDTA** This ingredient is a chelating agent, or sequestrant, which is commonly used in cosmetic products to help maintain formula stability and appearance. 

**Divine Supple Skin Elixir** Sweet concoction of Dark Chocolate and Wine Extract that nourish the skin and provide protection from harmful environmental stressors to the skin while detoxifying and providing more suppleness, smooth and youthful skin. 

**Dream Beam Elixir** Designer Skin® exclusive technology provides an instant subtle highlight to leave skin looking luminous. 

**DreamWear® Silicone Emulsion** Designer Skin® scientifically designed complex. Provides skin with moisturization, protection and prolonged dark color. This new silicone maintains the delicate balance of skin’s essential processes and magically blurs lines and wrinkles, while providing a velvety after feel. 

**DS ProBronze Extend** Designer Skin® scientifically designed complex. Patented combination of Erythulose and DHA provides darker more even coverage, with faster and longer lasting results. 

**Echinacea Extract** An extract from the purple cone flower and one of the most popular herbs...
in America; contains a compound phenol that has high antioxidant properties that help nourish and condition skin, helping to protect from environmental stress and factors for overall improved skin appearance.

**Eclipta Prostrata Extract** Also known as Maka Extract, this ingredient is an extract from an herb. Eclipta Prostrata is a biological additive that is used in cosmetics for its moisturization properties.

**Eco-Chic Hydration** A Swedish Beauty’ exclusive ingredient. Contains Aloe Vera, Honeydew Melon and Avocado Oil, which are superior moisturizers that help increase water content. Helps in cell rejuvenation and could reduce the appearance of fine lines and wrinkles.

**Eco-Trio™ Moisture Blend** Mother Earth’s finest anti-aging and hydrating-trio of Vitamin A, Vitamin E and Aloe for increased and intensified tanning power. Vitamin A ensures natural growth and developments of cells keeping skin healthy. Vitamin E is able to prevent damage to skin by free radicals, while Aloe’s natural skin softening and conditioning capabilities smooth and hydrate skin.

**Ectoin** See Skin Saver™.

**Elastin** One of the three main proteins found in the skin (along with collagen and reticulin). Elastin helps skin to return to its original position.

**Electric Rush Elixir** Designer Skin® exclusive blend of Peptides and Caffeine to help leave skin looking younger and feel rejuvenated.

**Emerald Extract** Designer Skin® exclusive ingredient. Contains Aloe Vera, Honeydew Melon and Avocado Oil, which are superior moisturizers that help increase water content. Helps in cell rejuvenation and could reduce the appearance of fine lines and wrinkles.

**Endless Moisture Seal Technology** Proprietary blend of soy lipids, soybean phytosterals and plant based ingredients that mimic the lipid structure of the human lipid bilayer. Quick penetration abilities allows for restoration of the lipid bilayer and maintenance of the barrier function.

**Erythrulose** A natural ketose obtained by biofermentation that leads to uniform tanning of the skin and provides longer-lasting color.

**Essential Fatty Acid Complex (Omega-6 Linoleic Acid, Omega-3 Linolenic Acid, Tocopherol, Linoleic Acid)** EFA’s (Essential Fatty Acids) aid tissue repair and growth. Both these two fats Omega 6 and Omega 3 (linoleic and alpha-linoleic acid) are essential for healthy skin by working together to keep skin smooth and soft and help the cells to retain the appropriate amount of water. Adequate EFA’s also help to reduce the dehydrating effects of heat, wind and other environmental factors.

**Eternal Essence™** California Tan’ exclusive combination of ingredients that help boost pro-collagen synthesis. Collagen is a structural protein found in skin, responsible for strength and elasticity, which helps to keep skin looking young. Increased pro-collagen synthesis helps tone and refresh skin for a more youthful look.

**Ethereal Moisture Veil** Designer Skin® exclusive technology works to seal in a layer of hydration that maximizes moisture with a lightweight feel. This layer allows skin to breathe, but also helps to protect skin, as it works to defend against free radicals.

**Ethoxydiglycol** This cosmetic ether-alcohol is used as a solvent or a carrier for some ingredients such as DHA.

It can also be used as a viscosity-decreasing agent.

**Eucalyptus** See Eucalyptus Globulus Extract.

**Eucalyptus Globulus Extract** This ingredient is an extract from the leaves of the Eucalyptus tree. Eucalyptus leaves contain tannins and an essential oil (Eucalyptol) that have antiseptic properties and can be used in cosmetics such as toners and astringents. It also has aromatherapeutic benefits.

**Ever Fresh Technology** Exclusive to California Tan Sunless’, it is a powerful malodor inhibition ingredient that works to inhibit unpleasant odors while helping to provide skin with a smooth and soft long-lasting feel.

**Everlasting Color Elixir™** Designer Skin’ exclusive technology combines DHA and Erythrulose in a specialized balance to develop steady, streak-free, ultra-dark color. Designed to provide immediate results, as well as to lengthen tan development for up to 7 days, resulting in uniform, flawless color.

**Fade Defy™ Technology** Concentrated amount of high-end, industry exclusive, ActivAloe’ Aloe Vera Gel is blended with Australian Native Kakadu Plum and provides antioxidants to the skin revealing a hydrated and nourished youthful complexion.

**Fade Defying™ Properties** Designer Skin’ scientifically designed complex blend introduced to protect melanin from Environmental Oxidative Stress and restore Oxidative balance. This complex offers a new definition in color protection. Lipid Barrier Protection, DNA Protection, Antioxidant, offers protection of other antioxidants (Vitamins), Free Radical Protection. Protects against oxidative stress and environmental stressors to preserve already established base color.

**FadeDefy™ Technology** Australian Gold® exclusive.

Harvested from its native Australia, the Kakadu Plum is the world’s richest source of Vitamin C and provides anti-inflammatory properties and antioxidants to the skin. Combined with Shea Butter it moisturizes, protects and repairs skin for longer-lasting, anti-fading color.

**FD&C Red No.4 (CI 14700)** This ingredient is a colorant used to color finished formulas.

**FD&C Yellow No. 5** This ingredient is a colorant used to
color finished formulas.

FD&C Yellow No. 6 (CI 15985) This ingredient is a colorant used to color finished formulas.

Fennel (Foeniculum Vulgare) Seeds See Skin Saver™.

Fifth House Fusion Designer Skin® exclusive technology helps to reinforce skin’s natural hydration with a lightweight feel as Vitamin E provides antioxidants to help protect skin from free radicals to prevent and diminish the appearance of fine lines and wrinkles.

Fig Extract This extract functions as an antioxidant and is proven for diminishing skin allergies, fighting free radicals that cause wrinkles and improving skin tone. It is also beneficial in reducing superficial surface skin cells to leave the skin refreshed and renewed.

Filterless Finish™ Complex Delivers a glamorous, matte finish to the skin that helps reduce the appearance of fine lines and wrinkles. Also works to help tone skin leaving a perfected appearance.

Fit Figure™ Contour Technology Designer Skin® exclusive ingredient that provides a soft focus effect to help visibly improve skin’s texture from every angle.

Flawless Finish Moisture Swedish Beauty® exclusive ingredient. An emollient blend of Shea Butter, Sweet Almond Oil and Macadamia Oil that spreads evenly while improving moisturization to promote a bronze glow. Great for those with dry skin.

Foeniculum Vulgare (Fennel) Extract contains soothing and purifying properties.

Flawless Matte Finish Modified cornstarch and other natural ingredients fill-in imperfections to give the appearance of radiant, gorgeous skin with a powdery finish.

Forskolin See Coelus Forskohlii Extract.

Fragrance See Parfum.

Freedom Formula™ Any combination of Sulfate, Nut, Gluten, Paraben and Silicone FREE; designed for sensitive skin.

French Rose Extract Inhibits production of free radicals, protects cell’s DNA from UV damage.

Fruit Cocktail Powerful combination of age fighting berries that work to even skin tone.

Galactoarabinan Age Defying, reduces the appearance of fine lines and wrinkles, significant improvement in skin texture, dryness, clarity, elasticity and uniformity of color, enriches skin feel.

Gardena Tahitensis Oil See Monoi Oil of Tahitian Origin.

Gardena Tahitensis Flower Also known as Tiare Flower. See Monoi Oil of Tahitian Origin.

Ginseng Also known as Panax Ginseng Extract, this ingredient is derived from the ginseng plant, which grows in the damp woodlands of Manchuria and is cultivated in Korea. Delivers energizing and micro-circulation benefits to the skin to aid in the dispersion of active ingredients, helping them to better penetrate into the skin. It is rich in vitamins such as B1, B2 and B12, nicotinic acid, pantothenic acid and biotin.

Glam Guardian™ Designer Skin® exclusive ingredient that helps set bronzers on the skin in place and can make them less likely to transfer.

Glistening Skin Blend Designer Skin® exclusive technology specially designed to add the finishing touch as it helps to brighten and smooth skin.

Gloss Over Technology Designer Skin® exclusive technology helps to ensure a quick and seamless application. Designed for a lightweight and fast application, the technology helps provide a rapid dry time and prevents a tacky after-feel or heavy finish. Created to help suspend and blend colorants for balanced and even results.

GlowGeometry Complex™ Designer Skin® exclusive skin moisturizing agent that aids in drawing moisture to the skin to help hydrate and quench for glowing results.

Glyceth-26 This humectant and moisturizer is a derivative of glycerin. It increases skin hydration, making skin softer and smoother.

Glycerin This humectant protects and seals moisture on the skin surface. It has been widely used in products as a moisturizing agent.

Glycerin Stearate This ingredient, derived from palm kernel oil, is used for its emulsifying and moisturizing properties. It is a monoester of Glycerin and Stearic Acid.

Glycolipids Mixed substances which contain carbohydrates covalently attached to a lipid. Skin-conditioning agent, moisture barrier and moisturizer.

Goji Berry Helps protect against free radicals and has a calming effect on skin. Aids in skin moisturization and contains Vitamin E and A.

Go Silky™ Swedish Beauty’ exclusive ingredient. Naturally occurring Silica provides a silicone-like feel, but in silicone-free microspheres. It scatters light to diminish the look of fine lines on the skin, while still letting enough light through so that skin looks natural. In addition, it provides an elegant, silky texture and increased blendability for supremely soft, smooth skin.

Gold Bio-chelate This material consists of colloidal Gold to increase the availability of gold to the skin. Gold helps create glowing skin and helps retain the collagen within the skin, leading to youthful appearance. Through tiny colloidal particles that are being absorbed into the skin, the skin retains a glow that comes from an increased sense of moisture and health and therefore retains a glow.

Goldenseal Extract (Hydrastis canadensis extract) Biological product and extract of herb of golden seal. Anti-inflammatory and antiseptic.

Gold of Pleasure Oil This natural oil helps combat dehydration and deepens the appearance of a tan. Known for its stimulating aromatic character, it is believed to help activate mind and keep it alert and active.

Green Tea A natural antioxidant that helps fight fine lines and wrinkles.

Grape Seed Oil Powerful moisturizer that tightens skin

Grapefruit Extract Known for its stimulating aromatic character, it is believed to help activate mind and keep it alert and active.

Guar Hydroxypropyltrimonium Chloride This ingredient is an antistatic agent for hair and a viscosity-increasing agent. It is one of the ingredients in Vitamin Cocktail. It is a quaternary amonium derivative of hydroxypropyl guar.

Guava A very rich source of Vitamin C that stimulates the production of collagen to help maintain the
elasticity of skin, reducing wrinkles and the size and number of pores. Guava is also rich in Vitamins A & B and is a good source of Carotenoids that aid in skin renewal and protection against environmental toxins. Guava has astringent and healing properties that help improve skin’s texture.

Gymnema Extract Natural color booster and bronzer.

Gynostemma Known to increase blood circulation to increase the amount of oxygen available to the skin. Helps detoxify and nourish skin for a better, healthier complexion.

Hamamelis Virginiana (Witch Hazel) Bark/Leaf/Twig Extract Used as a remedy for burns, scalds and inflammatory conditions. See Witch Hazel.

Hawaiian Ginger Promotes circulation in the skin helping the body feel rejuvenated and energized.

H.E.A.T.™ Haute Enhanced Action Technology Delivers superior dark color and enhanced sensation to the skin.

Helianthus Annuus Seed Oil See Sunflower Seed Oil.

Hemp Seed Hydrating Complex Utilizes a high-level of Hemp Seed Oil that is perfectly blended with extreme hydrating ingredients, providing deep moisturization and luxurious feel.

Hemp Seed Oil This multi-beneficial ingredient hydrates skin with a highly evolved balance of essential fatty acids, amino acids and vital nutrients.

Henna Extract (Lawsonia inermis) Botanical, color additive, skin conditioner, anti-microbial and anti-inflammatory.

Hibiscus Extract This flowering plant helps provide a smooth finish to the skin.

Honey Extract Honey, praised since ancient times for its virtues is ideal for sensitive skin. Possesses hydrating and skin softening properties. Rich in amino acids and oligosaccharides. Increases skin suppleness, softness and comfort. Helps diminish skin roughness for a smooth appearance.

Honeydew Aids in skin cell re-mineralization and rejuvenation, helping to reduce the appearance of aging.

Honeysuckle Extract This skin-conditioning agent is an extract from the flowers of Loniceria Japonica, also known as Honeysuckle. It has skin soothing properties.

Hot Action™ Complex This complex is a blend of nicotinates that increase blood microcirculation in the skin which causes the skin to flush, warm and redden.

Hyaluronic Acid This ingredient is a potent humectant that absorbs moisture from the air to help hydrate the skin.

HydraRich™ Blend Shea Butter, Jojoba and Glycerin provide a luxurious feel and work synergistically for maximum hydration.

HydraMoist™ Complex Deep moisturizing and conditioning complex made from a naturally occurring carbohydrate and plant derived sugar that uses an unique mechanism to bind water to the skin, providing deeper hydration, improved skin smoothness and softness and strengthened skin barrier function.

HydraPlex™ Technology Well-balanced blend of silicones and Isopropyl Glycol give the lotion a unique feel, making it easy to spread and provide superior moisture retention properties that maintain high skin moisture content with a long-lasting effect, leaving the skin with a silky feel and nourished dark color.

Hydration Blend Softens, smooths and hydrates by infusing skin with moisture.

Hydrolyzed Algin (Laminaria D) See Skin Saver.

Hydrolyzed Elastin This protein derivative increases emolliency and moisturization of skin.

Hydrolyzed Milk Protein Also known as Milk Yogurt. Nutritionally rich in protein, calcium, riboflavin, vitamin B6 and vitamin B12. Hydrolyzed Milk Protein lays the foundation for optimum color results.

Hydroxypropyltrimonium Chloride This ingredient provides exceptional moisture to skin and helps to keep moisture in skin.

Iron Oxides When hit by light, this colorant or pigment partly reflects, refracts and transmits the rays. The color produced is seen as luster in a phenomenon known as light interference.

Isododecane This ingredient gives excellent spreadability characteristics to creams and lotions.

Isopropyl Lanolate Ester of isopropyl alcohol and lanolin acid. Binder, skin-conditioning agent and emollient.

Instant Ideal Complex Designer Skin® exclusive technology helps provide instant, streak-free dark color with a violet hue for dark brown results. Requires no development time for ready-to-wear results that wash away with soap and water.

Intensifier Active ingredients that help the skin naturally achieve dark, bronze color. Triggers and boosts melanin production and distribution process to achieve skin’s highest natural color potential.

ION Color Technology™ Increases cell longevity while offering a more intense, faster acting, longer-lasting, natural dark hue.

Ipomea Sweet Purple Extracted from the sweet potato, it contains caffeic acid which has been shown to help firm skin. Also, contains emollient and moisturizing properties.

Irish Moss (Chondrus crispus or Carrageenan) Seaweed, anti-irritant, antioxidant, anti-microbial, skin-conditioner, gellant and a suspending agent.

Iron Oxides When hit by light, this colorant or pigment partly reflects, refracts and transmits the rays. The color produced is seen as luster in a phenomenon known as light interference.

Isododecane This ingredient gives excellent spreadability characteristics to creams and lotions.

Isopropyl Lanolate Ester of isopropyl alcohol and lanolin acid. Binder, skin-conditioning agent and emollient.

Intense Hydration Blend Exclusive to California Tan Sunless® and is a combination of ingredients that provides exceptional moisture to skin and helps to keep moisture in skin.

Jojoba Oil This oil is extracted from the crushed seeds of Simmondsia Chinensis, a plant that grows spontaneously in the intense heat and dryness of desert environments. This triglyceride contains linoleic
Lavish 3D Finish™ Designer Skin® scientifically designed technology; this lightweight formula is packed with antioxidants from Super Fruits to nourish skin. Quenches skin for the ultimate tanning cocktail.

Kamani Tree Oil (Calophyllum Inophyllum oil) Oil expressed from fruit of Calophyllum Inophyllum. Has skin-conditioning, emollient, skin-healing, anti-aging, anti-microbial properties, rich in minerals and vitamins.

Lavender Absorbs excess moisture to leave skin feeling soft and smooth.

Kukui Nut Husk Extract Botanical cosmetic bronzer.

Kukui Nut Oil In addition to being a botanical cosmetic, Kukui Nut Oil is a skin conditioning agent, emollient, moisturizer and anti-inflammatory rich in vitamins and minerals.

Lactic Acid Exfoliant, pH adjuster.

Laminaria Ochroleuca See Algae.

Last Call Complex Designer Skin® exclusive technology helps develop steady, long-lasting dark color with a specific balance of Peptides and a sunless agent, that work together to amplify color development.

Laureth-4 Polyethylene glycol ether of Lauryl Alcohol. Surfactant, emulsifying agent, dispersant.

Lavender Acts to soothe the skin and helps naturally fight after tan odor due to its strong aromatic properties.

Lavish 3D Finish™ Designer Skin® exclusive blend of Vitamins and a Collagen Stimulating Peptide designed to help provide a smoother appearance and younger looking skin.

Lecithin This naturally occurring mixture of the diglycerides of stearic, palmitic and oleic acids, linked to the choline ester of phosphoric acid, is found in living plants and animals and is one of the ingredients in Vitamin Cocktail.

L.E.D.” (Light Engaged D. e fian ce”) Designer Skin® scientifically designed complex. A multifunctional system combats damaging effects of compounds that breakdown the production of collagen and elastin, the proteins responsible for skin’s tone and elasticity.

This system additionally increases collagen production and improves the appearance of skin. Combined with powerful antioxidant protection, Light Engaged D. e fian ce” boosts skin’s own regenerative powers to help further diminish the appearance of aging.

Lemon Fruit Extract Rich in Vitamin C, this ingredient is derived from the juice of a lemon. This extract is known for its acidic qualities and can be used in skin care to assist in lifting and removing stains and odors from the skin.

Lemon Peel Extract Extracted from the fresh peel of lemons, lemon peel extract contains Terpenoids, Flavonoids, Glycosides and Vitamin C. This ingredient is very nutritious and is used in skin care products to help to attain youthful skin.

Licorice Extract Helps protect skin and prevent hyperpigmentation for a more even tan.

Ligustrum Lucidum Fruit Extract Increases microcirculation, energizes skin for optimal color results.

Lime Fruit Extract See Citrus Aurantifolia.

Limbless Tanning Complexe™ Designer Skin® scientifically designed complexe that adds Dopa to the skin, which is a Melanin precursor.

Linden Flower Extract (Tilia cordata flower extract) Skin-conditioning agent, anti-inflammatory, emollient, antioxidant, anti-aging and anti-wrinkle moisturizer, rich in manganese and Vitamin C.

LipoBronze® Blend A complex of active ingredients designed to enhance tanning. Composed of a tyrosine derivative and other tan promoting ingredients.

Liposomal Illuminating Complex Cellular C protects skin from oxidative stress and reduces the levels of free radicals produced by exposure to environmental factors, while also increasing collagen levels that help strengthen elasticity and hydrate for a youthful glow. Pure E uses four forms of Vitamin E in its purest form that contain powerful antioxidant properties that help neutralize free radicals and help to prevent and diminish fine lines and wrinkles, while softening and moisturizing for radiant beautiful results.

Liquorice Root Extract (Glycyrrhiza glabra (Licorice) root extract Natural extract used to reduce dark circles under eyes.

Lonicer a Japonica Extract See Honeysuckle Extract.

Luffa Cylindrica Seed Oil This oil is obtained from the seeds of Sponge Gourd (Luffa Cylindrica), is rich in Linoleic Acid and restores skin’s natural lipids.

Luxe Light Complex™ Designer Skin® exclusive technology works to optimize the UV experience by promoting light to travel seamlessly to skin, while fortifying with minerals and amino acids for optimal melanin production and stunning results.

Macadamia Seed Oil When Macadamia Seed and Kiwi Seed Oils are mixed, the fatty acid composition of the two oils is similar to human sebum. Sebum is essential to protect the skin. The oil mixture helps to maintain optimal hydration levels in the skin by strengthening the barrier between skin and the environment. This seed oil combination provides skin softness, hydration and protection.

Magnesium Aluminum Silicate This complex silicate is refined from naturally-occurring minerals. It is used as an absorbent and viscosity-increasing agent.

Magnificent Natural Luxe Bronzer Premium blend of Natural Bronzers, DermaDark® and nourishing ingredients promote instant dark color results, developed color after session and protection from environmental factors for a longer-lasting bronze hue.

Magnolia Bark Extract A powerful antioxidant and anti-aging extract. Great for reduction of wrinkles and firming.

Mahakanni Liposomal Delivery System Powerful and proprietary blend of ingredients, including Mahakanni and Melanin, helps to deliver instant and delayed dark color.

Maka Extract See Eclipta Prostrata Extract.

Mango Extract Smoothes, softens and firms skin for glowing tanning results.

MAP (Melanin activating peptide) Stimulates the synthesis, the production and the distribution of natural melanin in the epidermis. Induces a discrete and natural tan even without UV exposure.

Marcocystis Pyrifera Extract This extract is a polysaccharide of marine origin (seaweed) that holds water molecules, imparting texture and mildness to
2020 Ingredient Glossary

Antioxidant, germicide, penetrates skin and heals quickly, fragrance ingredient.

MelaDark™ Blend Known as the Icelandic Bilberry, this exotic, dark purple berry is reported to have the highest antioxidant value of any superfruit.

MelaLift Skin Energy Designer Skin® exclusive ingredient that targets the special form of melanin needed for the naturally fair skinned to achieve dark, rich color.

Melanin This biopolymer is a free radical scavenger and antioxidant and protects against lipid peroxidation. It also protects the skin by absorbing ultra violet light and can help promote the formation of a deeper degree of tanning in a shorter amount of time when it is blended with L-tyrosine. The combination of melanin and L-tyrosine also provides full spectrum free radical protection.

Melanin Activating Peptides (MAP) Stimulates melanin production.

MelanIN® Bronzer Designer Skin® exclusive ingredient is a natural form of melanin that promotes deeper, darker color in a shorter amount of time.

Melatime™ An industrial breakthrough tanning accelerator peptide that speeds up melanin production, boosting and maintaining the tan.

Melissa Officinalis Extract (Balm) This ingredient provides soothing, purifying and tonifying properties.

Menthol This ingredient is used as a cooling agent to draw warmth away from the skin and as a skin-stimulating agent to increase micro-circulation for plumper, fuller lips.

Methyl Glucose Sesquistearate Emulsifier, moisturizer.

Methyl Nicotinate This ester of methyl alcohol and nicotinic acid increases microcirculation and imparts a warm “tingling” effect. The microcirculation appears as a red flushing that occurs due to the increased blood flow to the skin and will add temporary color to the skin.

Methylparaben This ingredient is a preservative with a long history of safety and efficacy.

Mica This silicate mineral creates a shimmer on the skin. See also Titanium Dioxide.

Milk Thistle Extract (Silybum Marianum Extract) Skin-conditioning agent. Contains a unique type of flavonoid ‘silymarin’ with antioxidant activity; fatty acids; and magnesium. Anti-aging and anti-wrinkle. UVB protector and prevents DNA damage caused by the sun.

Mineral Magnificence Swedish Beauty® exclusive ingredient. In addition to providing remarkable skincare and a natural radiance, the minerals Copper and Zinc, found in sea salt, help boost skins ability to create Melanin. Copper is known to increase color by boosting Melanin synthesis, while Zinc is also a critical component to the DOPAchrome enzyme, which also plays a major role in Melanin production. Together, they fortify skin to support bronzing activity.

Moisturizing Aloe-Base Concentrated amount of Aloe Vera allowing it to be listed as 1st on the label; derived from the leaves of the Aloe Vera plant, it helps heal, soothe, soften and moisturize for smooth, healthy skin; also contains more than 200 active Amino Acids,
INGREDIENT GLOSSARY

Monoi Oil of Tahitian Origin

Monoi Oil results from steeping Tiare flowers in coprah oil. The latter is obtained from dried coconut pulp, which is exclusively produced by the Cocos nucifera L. (Arecaceae) tree. French Polynesian natives use Monoi Oil for cosmetic and medicinal purposes. It is renowned for protecting skin and hair from the effects of the sun and sea salt. The oil is hypoallergenic and has excellent moisturizing and nourishing benefits to soften the skin. It also helps prolong a tan with no risk of skin drying due to its anti-dehydration properties. Monoi oil has a very pleasant fragrance.

Mother of Pearl

This natural marine shell is rich in oligoelements and is used as a luxurious, elegant additive.

Musa Sapientum

This extract of the banana fruit aids the skin in tanning because it adds DOPA to the skin which is a melanin precursor.

Mustard Sprout Extract

Increases blood flow, causing redness and a warm feeling upon application and has been shown to improve hydration after a single application.

Moisture Elixir™ California Tan exclusive blend of soluble sphingolipids, triglycerides and sterols to mimic the skin’s membrane, creating a barrier that helps retain moisture. With this, skin becomes drastically more hydrated helping to diminish the appearance of fine lines and wrinkles. Helps improve the skin’s radiance while leaving it with a luminous glow.

Moisture Magnet

Water attracting blend that helps skin stay moisturized for a healthier, dewy glow.

Moisture Rich Blend

A California Tan Sunless® blend found in the Color Perfecting Complex® Gradual Sunless Lotion that combines water attracting ingredients and safflower oil to hydrate skin by pulling water to the surface and creating a barrier to lock-in hydration.

Monoi de Tahiti®

Demonstrated to be a natural color enhancer, long-lasting moisturizer, and improves skin smoothness and firmness.

Moringa (Pterygosperma) Seed Extract

A natural and native peptide of exotic origin obtained by mild extraction of Moringa Seeds from Moringa tree without using any chemical solvent; contains oil called Behen Oil, which was used by ancient civilizations to prepare cosmetic, medicinal or religious ointments; helps to protect skin from stress and pollution; good for dull, dry, wrinkled skin to visibly increase tone and firmness; especially effective in purification properties for daily pollution caused by micro particles from smoke, home and industrial dust; promotes a radiant looking complexion and a pleasant feeling touch.

Mother of Pearl

This natural marine shell is rich in oligoelements and is used as a luxurious, elegant additive.

Murumuru Seed Butter

This oil has a very pleasant fragrance.

Nettle Extract (Urtica Dioica Extract)

NeverFade™ Tattoo Technology

Propriety blend of ingredients maximize tattoo’s life and color with exquisite moisturization that helps to maintain vibrant colors and conditions skin for tattoo clarity

Niacinamide

Not So Basic Brilliant Blend

An exclusive blend of Safflower Oil and Avocado Oil. High in Omega-6 and rich in Vitamins A, D and E, the blend helps to condition and bring out skin’s natural glow.

Night|Shift Aromatherapy Infusion

Designer Skin® exclusive miracle blend of rare Blue Lotus and Queen of the Night flowers that have aromatherapy and aphrodisiac properties.

Non-Comedogenic

Sweet selected oil-free skin conditioners that won’t clog pores.

Oat Extract

This extract from the oat plant moisturizes while creating a smooth, even tan.

Oat Kernel Protein (Avena sativa kernel oil)

A unique ingredient extracted from oats to help fight against wrinkles; rich in polysaccharides and small biologically active proteins; helps to maintain soft feel of the epidermis; anti-wrinkle properties; visibly improves smoothness and tone.

Oat Protein

See Oat Kernel Protein.

Octoxynol-11 Solubilizer, Octyl Methoxycinnamate (Ethylhexyl methoxycinnamate)

Ester of 2-ethylhexyl octoxynol-11, a non-ionic surfactant that has a mild foaming quality. It is used as a solubilizer for pigments and other water insoluble substances used in cosmetic products.

Oat Protein

See Oat Kernel Protein.

Oat Kernel Protein (Avena sativa kernel oil)

A unique ingredient extracted from oats to help fight against wrinkles; rich in polysaccharides and small biologically active proteins; helps to maintain soft feel of the epidermis; anti-wrinkle properties; visibly improves smoothness and tone.

Oat Protein

See Oat Kernel Protein.

Octoxynol-11 Solubilizer, Octyl Methoxycinnamate (Ethylhexyl methoxycinnamate)

Ester of 2-ethylhexyl octoxynol-11, a non-ionic surfactant that has a mild foaming quality. It is used as a solubilizer for pigments and other water insoluble substances used in cosmetic products.

Oat Kernel Protein (Avena sativa kernel oil)

A unique ingredient extracted from oats to help fight against wrinkles; rich in polysaccharides and small biologically active proteins; helps to maintain soft feel of the epidermis; anti-wrinkle properties; visibly improves smoothness and tone.

Oat Protein

See Oat Kernel Protein.

Octoxynol-11 Solubilizer, Octyl Methoxycinnamate (Ethylhexyl methoxycinnamate)

Ester of 2-ethylhexyl octoxynol-11, a non-ionic surfactant that has a mild foaming quality. It is used as a solubilizer for pigments and other water insoluble substances used in cosmetic products.

Oat Kernel Protein (Avena sativa kernel oil)

A unique ingredient extracted from oats to help fight against wrinkles; rich in polysaccharides and small biologically active proteins; helps to maintain soft feel of the epidermis; anti-wrinkle properties; visibly improves smoothness and tone.

Oat Protein

See Oat Kernel Protein.

Octoxynol-11 Solubilizer, Octyl Methoxycinnamate (Ethylhexyl methoxycinnamate)

Ester of 2-ethylhexyl octoxynol-11, a non-ionic surfactant that has a mild foaming quality. It is used as a solubilizer for pigments and other water insoluble substances used in cosmetic products.

Oat Kernel Protein (Avena sativa kernel oil)

A unique ingredient extracted from oats to help fight against wrinkles; rich in polysaccharides and small biologically active proteins; helps to maintain soft feel of the epidermis; anti-wrinkle properties; visibly improves smoothness and tone.

Oat Protein

See Oat Kernel Protein.

Octoxynol-11 Solubilizer, Octyl Methoxycinnamate (Ethylhexyl methoxycinnamate)

Ester of 2-ethylhexyl octoxynol-11, a non-ionic surfactant that has a mild foaming quality. It is used as a solubilizer for pigments and other water insoluble substances used in cosmetic products.

Oat Kernel Protein (Avena sativa kernel oil)

A unique ingredient extracted from oats to help fight against wrinkles; rich in polysaccharides and small biologically active proteins; helps to maintain soft feel of the epidermis; anti-wrinkle properties; visibly improves smoothness and tone.

Oat Protein

See Oat Kernel Protein.

Octoxynol-11 Solubilizer, Octyl Methoxycinnamate (Ethylhexyl methoxycinnamate)

Ester of 2-ethylhexyl octoxynol-11, a non-ionic surfactant that has a mild foaming quality. It is used as a solubilizer for pigments and other water insoluble substances used in cosmetic products.

Oat Protein

See Oat Kernel Protein.

Octoxynol-11 Solubilizer, Octyl Methoxycinnamate (Ethylhexyl methoxycinnamate)
alcohol and methoxycinnamic acid. Sunscreen agent, UVB absorber.  
**Octyl Palmitate (Ethylhexyl Palmitate)** Ester of 2-ethylhexyl alcohol and palmitic acid. Fragrance ingredient, skin-conditioning agent, emollient, binder.  
**Oxyl Salicylate (Ethylhexyl salicylate)** Ester of 2-ethylhexyl alcohol and salicylic acid. Sunscreen, UVB absorber. Fragrance ingredient.  
**Odor Absorbing Blend** A blend made specifically for the California Tan Sunless® After Sunless Powder that absorbs excess moisture and malodor for a more pleasant smell.  
**Odor Neutralizer Technology** Exclusive to California Tan Sunless® and is a combination of two powerful odor neutralizing ingredients that attack ATO on two fronts: breaking down malodor molecules, minimize and absorb odors and replacing them with Crisp Pear fragrance.  
**Olive Fruit Oil** Obtained from the ripe fruit of Olea Europaea, this oil is the fraction of olive oil, which is not saponified, in the refining recovery of olive oil fatty acids. This oil is considered the standard for emollience in skin care. It is also used as a skin-conditioning agent.  
**Olive Leaf Extract** Therapeutic antioxidant, extremely moisturizing.  
**Olive (Olea Europaea) Oil** Olive Oil is obtained from the ripe fruit of Olea Europaea. It is the fraction of olive oil, which is not saponified, in the refining recovery of olive oil fatty acids. This ingredient is considered the standard for emollience in skin care. It is also used as skin-conditioning agent.  
**Omega Oils** Help maintain skin’s natural moisture barrier and enhance its ability to retain moisture. Emollient.  
**Opal Extract** A mineral that provides skin radiance and imparts a radiant silver glow.  
**OptiGlow Blend** Designer Skin® scientifically designed complex blend. Photo-reactive complex that produces a radiant appearance and a healthy-looking, tingle free glow.  
**Optimizer** This is the “Beyond Bronze Breakthrough” with the most potent, advanced formulation and bronzers available in a family of products. Designed for advanced tanners who want to break the bronzing barriers and plateau for unsurpassable results.  
**Optimum pH Serum** Designer Skin® exclusive ingredient to help adjust and optimize skin’s pH level for rapid, superior sunless color development.  
**Orange Fruit Extract** Rich in Vitamin C, this fruit extract is known for its acidic qualities and can be used in skin care to assist in lifting and removing stains and odors from the skin.  
**Orange Peel Extract** See Citrus Aurantium Dulcis.  
**Orange Peel Wax** See Citrus Aurantium Dulcis.  
**Orange Oil (Citrus Aurantium Dulcis Oil)** Oil obtained by expression from fresh peel of ripe fruit Citrus Sinensis. Fragrance ingredient, anti-septic, anti-bacterial, anti-inflammatory, local stimulant.  
**Orchid Extract** A graceful flowering plant that blooms all year round, and is known for its vibrant character that brings invigorating energy to its surroundings.  
**Oryzanol** Antioxidant, skin-conditioning agent.  
**Oxidative Technology** Rejuvenates skin cells and provides skin with oxygen to help reduce fine lines and wrinkles.  
**Oxygenator** Replenishes and replaces carbon dioxide with oxygen, facilitates skin’s respiration.  
**Palm Date Extract** Packed full of vitamins including Vitamins A, C, E, K, B2, B5, B6, Niacin and Thiamin, this is an antioxidant powerhouse helpful in protecting skin from free radicals. Palm Date is also rich in minerals for skin remineralization.  
**Panax Ginseng Extract** See Ginseng Extract.  
**Panthenol** This ingredient is Phyto-Vitamin B5, which is part of the B-complex group. It is essential in the synthesis of lipids and proteins and is used as a deep-penetrating skin moisturizer.  
**Papain** This natural proteolytic enzyme “softens” and digests protein components of the intercellular matrix. This process essentially exfoliates dead and damaged cells from the skin’s surface which enhances skin smoothness and encourages the development of newer cells, resulting in smoother, younger-looking skin.  
**Papaya** In the form of papain, a natural proteolytic enzyme extracted from Carica papaya latex, specifically hydrolyses collagen, “softens” and digests protein components of the intercellular matrix. This process is essentially exfoliating dead and damaged skin cells from the skin’s surface, enhancing skin smoothness and encouraging the development of newer cells, resulting in smoother, younger-looking skin.  
**Parabens** Proven preservative system widely used in cosmetic products to ensure a safe consumer experience. Note: With our consumer driven industry the need was apparent to provide an alternative preservative system. The phrase “formulated without parabens” means no parabens were in any of the ingredients added to the formula.  
**Parfum** Also known as fragrance, this ingredient provides esthetic and sometimes aromatherapeutic benefits to a product. It contains a material or a combination of ingredients added to a cosmetic to produce or to mask a particular odor.  
**Passionflower (Passiflora Edulis Flower)** Extract of flowers of the passionflower. Skin-conditioner, emollient, moisturizer, healing and soothing.  
**Passion Fruit Super Fruit Juice-Base** Designer Skin® scientifically designed base. Passion Fruit provides a moisturizing effect that makes skin feel hydrated and refreshed. Passion Fruit is packed with Vitamins A and C, Potassium and Beta Carotene.  
**Patchouli Extract** This extract is made from the leaves of the shade-loving plant Pogostemon Cablin, commonly known as Patchouli. It has been a much-prized herb in the East since ancient times when it was used to scent linen and clothes. It is still used extensively in modern perfumery and aromatherapy and is used as a biological additive for better moisturization of the skin.  
**Peach Extract (Prunus Persica Fruit Extract)** Contains phenolic compounds which give it high antioxidant power to help improve overall skin texture and protect skin from environmental stressors, while also helping support skin rejuvenation for a glowing complexion.  
**Peach Leaf Extract (Prunus persica)** Skin conditioner.  
**Pecan** An excellent source of Protein, Zinc, Vitamins A and E, Folate and Phosphorus that play an important role in maintaining perfect skin. Zinc helps prevent against infection and promotes a clear complexion while Vitamins A and E fight and eliminate skin aging. Thus, Pecans can help prevent the occurrence of fine lines, wrinkles and hyperpigmentation.
**PEG-100 Stearate** This surfactant is used in moisturizing and skin care preparations, as well as hair conditioners.

**PEG-20 Almond Glycerides** This ingredient is a polyethylene glycol derivative of the mono and diglycerides from Almond Oil. It is used as a skin-conditioning agent, emollient, surfactant and emulsifying agent.

**PEG-40 Hydrogenated Castor Oil** This ingredient is a polyethylene glycol derivative of hydrogenated Castor Oil. Castor Oil is obtained by cold pressing the seeds of Ricinus Communis Euphorbiaceae, also known as the Castor Oil Plant. The oil is rich in fatty acids such as ricinoleic, oleic, linoleic, palmitic and stearic acid. It is widely used in the pharmaceutical and cosmetic industries as an emulsifying agent and for its solubility in products.

**PEG-8** This ingredient is a polymer of ethylene oxide.

**PEG-8 Beeswax** This ingredient is a polyethylene glycol derivative of Beeswax. It is used as a surfactant emulsifying agent and has film-forming properties on the skin. It increases skin moisturization and leaves a velvety after-feel.

**Pentylene Glycol** Also known as Hydrolite-5, this ingredient improves skin moisture while it also improves the microbiological stability of cosmetic products. It increases the degree of hydration to the skin and reduces the appearance of fine lines and wrinkles. It contributes to skin elasticity and smoothness, encouraging skin to uniformly reflect light from its surface.

**Peppermint Extract** Provides the skin with a natural cooling sensation.

**Peppermint Leaf Extract (Mentha piperita leaf extract)** Rich in minerals, flavonoids and phenols; has antioxidant, anti-inflammatory and free radical scavenging properties.

**Perfluorodecalin** This ingredient helps to increase oxygen intake in the skin while making skin feel smooth and refreshed.

**Perilla Oil** Perilla is a genus of an annual herb that is a member of the mint family. It helps prevent loss of skin elasticity and is rich in essential minerals, vitamins and fatty acids that help fight skin aging. It also has anti-inflammatory and anti-allergic benefits.

**Persimmon** Contains multiple skin nutrients with minerals such as Potassium, Calcium, Manganese and Iron. Persimmon extract is known to increase collagen production and improves dull skin, giving it an even, healthy-looking glow.

**Petrolatum** Only high purity food and pharmaceutical grade white petrolatum USD grade is used in our products. It is distilled by a special process to insure it is completely non-toxic.

**Phellodendron Amurense Bark Extract** An extract that reduces Trans-epidermal Water Loss (TEWL), increases skin hydration and improves skin suppleness. Effective in promoting skin barrier repair and rejuvenation.

**Phenoxyethanol** This ingredient is a preservative.

**Phospholipids** These act as a skin conditioners and help to facilitate the delivery of active ingredients into the skin for greater penetration and efficacy. See Vitatan®, Saccharomyces Lysate Extract.

**Phyllanthus Emblica (Amla) Fruit Extract** Known as the “indian gooseberry”, this fruit extract contains a high content of Vitamin C to protect against free radicals and nourish skin.

**Phytosterols** Components of plant cell membranes, regulates the balance and activity of the lipids in the superficial layer of the skin, stimulates the regeneration process.

**Pineapple Fruit Extract** Natural anti-inflammatory that helps to reduce the signs of aging that is also rich in alpha-hydroxy acids, which helps to improve skin hydration and remove damaged and dead cells to help achieve a clear, glowing complexion.

**Pink Lotus Extract** Believed to bring about feelings of tranquility and euphoria, this ingredient provides a sense of comfortability and warmth, as well as an expanded sense of awareness.

**Plankton Extract** This extract is a marine active ingredient obtained by biotechnology from a specific zooplankton called Artemia Salina. This material holds a remarkable potential of energy that can stimulate cellular metabolism to revitalize aged skin, improve the radiance of skin complexion, tone and bring strength to the cutaneous tissue and trap free radicals.

**Platinum Bio-chelate** This material consists of colloidal Platinum to increase the availability of platinum to the skin. Platinum helps recharge the skins electrolyte balance and helps protect skin’s DNA.

**Playful Papaya Blend** Swedish Beauty’ exclusive ingredient. A blend of ingredients designed to provide a softening effect to skin, creating a naturally smooth appearance. The active ingredient Papain, from Papaya, helps even skin tone, leaving behind a polished and refreshed look.

**Plum Crazy Blend** Swedish Beauty’ exclusive ingredient. An exclusive blend of 3 different plums; Plum Pine, Burdekin Plum and Murunga Plum. Each is packed with antioxidants to fight against environmental aggressors, soften and moisturize. These powerful plums also have anti-inflammatory properties that can help reduce puffiness. The Vitamin C concentration in plums can be 100 times more than that of an orange, helping to maintain the elasticity of skin and reduce the appearance of fine lines and wrinkles.

**Plush Silicone Blend** Designer Skin’ exclusive technology helps to blur fine lines and wrinkles while leaving behind a luxurious, non-greasy after-feel.

**Pogostemon Cablin Extract** See Patchouli Extract.

**Pollution Protection™** Swedish Beauty’ exclusive ingredient. A proprietary blend coats skin to form a defensive layer, helping to protect it from environmental stressors and urban pollutants such as dust, smoke, smog, pollen and fumes.

**Polyacrylamide** When found in combination with C13-14 Isoparaffin and Laureth-7, this ingredient is a self-emulsifying and thickening agent that can make instantaneous gels, creams and lotions at room temperature. It imparts a smooth, unctuous feel.

**Polyglycerylmethacrylate (Glyceryl Polymethacrylate)** Ester of glycerin and polymethacrylic acid. Film former, moisturizer, thickener.

**Polysorbate 20** This derivative from Sorbitol is a surfactant agent that is frequently used to increase solubility of fragrance oils into water-based systems.

**Polysorbate 60** This Sorbitan derivative is used as a solubilizing agent for fragrances.

**Pluysaturated Fatty Acids** Long-chain carbon...
2020 Ingredient Glossary

**Compounds having two or more double bonds between the carbon atoms. Examples are olive, sunflower, soybean, sesame seed, corn oils, etc. Emollient, emulsifiers and binders.**

- **Pomegranate Extract** See Punica Granatum Extract.
- **Pot Marigold Extract** See Calendula Officinalis Extract.
- **Potassium Caproyl Tyrosine** See Tyrostan.
- **PowerBoost Compound** A trio of ingredients, including Whey Protein, which energize skin for a more toned appearance, hydrate skin for long-lasting color and impart additional proteins on the skin for competition dark color.
- **PPG-20 Methyl Glucose Ether Distearate** Diester of PPG-20 (polypropylene glycol) Methyl Glucose Ether and stearic acid. Skin-conditioning agent, emollient.
- **Premium Skincare Blend** Utilizes a combination of Pomegranate and Ginger Extracts to moisturize, soothe and detoxify skin.
- **Prestigious DHA Luxe Bronzer** Sophisticated blend of superior ingredients that work with DHA for deeper, darker color than ever before. This unique blend infuses the skin with hydration, while also soothing and reducing irritation of the skin. Dark color will continue to develop with optimal color results displaying 2 to 3 days after initial tanning session.
- **Propolis Extract** An extract of bee hives that has been used for hundreds of years in medicine, bees use propolis to keep out foreign or invading species and functions similarly on the skin by forming a layer that helps protect against external environmental factors and protects against inflammation.
- **Propylene Glycol** This aliphatic alcohol is used as a skin conditioning agent and humectant. It is also used to solubilize the ingredients in Germall and Germaben II - an antioxidant used to protect while preventing oxidative stress to the skin.
- **Pro Vitamin B5** Is Panthenol, which is a key ingredient in Vitamin Cocktail. See also Vitamin Cocktail.
- **Psidium Guajava (Guava) Fruit Extract** Known as the “apple of the tropics”, Guava is a very rich source of Vitamin C that stimulates the production of collagen to help maintain the elasticity of skin; reducing wrinkles and the size and number of pores. Guava is also rich in Vitamins A and B and is a good source of Carotenoids, that aid in skin renewal and protection against environmental toxins. Guava has astringent and healing properties that help improve skin’s texture.
- **Pumice** This very light, porous igneous rock, also known as solidified lava, is made up of very tiny crystals that, when combined with emollients it can be used to exfoliate skin.
- **Pumpkin Extract (Cucurbita Pepo Extract)** Skin-conditioning agent, moisturizing, wound healing. Rich in minerals, lecithin and Vitamin F.
- **Quinoa Extract** An abundant source of protein and minerals and acts as a powerful antioxidant that helps protect while preventing oxidative stress to the skin.
- **Red Light Collagen Boost** Superior skincare ingredients, including Peptides, are rich in amino acids which help to promote the synthesis of proteins and help provide support to the skin; these ingredients are also known to help boost collagen and elastin production which help to improve overall smoothness of the skin when used in conjunction with red light therapy.
- **Red Sea Algae** This algae is naturally rich in polysaccharides, vitamins and amino acids. It makes skin feel healthy and moisturized.
- **Rejuvenox** Designer Skin® scientifically designed technology contains mini amino acids that have been clinically shown to help produce faster and darker color, while providing superior anti-aging benefits.
- **Purrfection Finish Primer** Natural polymer combined with a brightening agent to fill in imperfections for the appearance of a healthy, even, radiant skin tone, while leaving the skin feeling soft and smooth to the touch.
- **Quartz** Commonly found in Pumice and utilizes small particles to exfoliate the skin, giving it luminosity and shine.
- **QuickDry Technology** Unique alcohol-free technology formulated with a trio of ingredients (isododecane, silica and cyclopentasiloxane) for a very rapid drying period after application.
- **Raspberry Seed Oil** See Rubus Idaeus Seed Oil.
- **Red Algae Extract** Rich in minerals to help keep natural balance of skin; promotes healthy skin; contains amino acids essentials to protein synthesis and skin elasticity; has hydration maintenance benefits which help in maintaining a perfect tan color.
- **Rejuvenox** Designer Skin® scientifically designed complex; facilitates skin respiration which allows oxygen...
to be transported into the skin and carbon dioxide transported out. Oxygen is an absolute requirement for melanin formation, to help increase and optimize color we boost the oxygen content of the skin.

**Retinyl Palmitate** Also known as Vitamin A, this ingredient helps initiate cell growth and protein production and ensures that the skin functions at an optimal level. It is an ingredient in Vitamin Cocktail. See Vitamin Cocktail.

**Retinyl Palmitate Polypeptide** This ingredient is a glycoprotein complex containing Retinyl Palmitate, also known as Vitamin A. It optimizes the efficient normal working of the skin’s cells while also providing additional moisturization and protection for the skin. See Retinyl Palmitate.

**Rooibos Extract** Rooibos leaves are rich in naturally occurring nutrients. This extract contains 9 flavonoids that, working in conjunction with high Vitamin C content, help neutralize free radicals which protects the body against premature aging. It is also used for its soothing properties.

**Rose Water** This ingredient helps initiate cell growth and protein production and ensures that the skin functions at an optimal level. It is an ingredient in Vitamin Cocktail. See Vitamin Cocktail.

**Rosemarius Extract** See Rosmarinus Officinalis Leaf Extract.

**Rosewood Oil** With a woody, floral fragrance, this is a Relaxing oil that is also useful for improving dry, dull and lackluster skin. 

**Rosé Risqué Complex™** Designer Skin® exclusive technology provides tantalizing dark color by capturing a vibrant bouquet of red, violet and blue tones combined with golden caramel for balanced, prismatic results.

**Rose Water** This ingredient is known for its soothing and cleansing properties and helps to keep skin feeling soft and looking radiant.

**Rosmarinus Officinalis Leaf Extract** This ingredient is extracted from the leaves of the Rosemary shrub. It has potent antioxidant and skin-conditioning properties.

**Rubus Idaeus Seed Oil** Derived from the dried seeds of Raspberry, this oil contains high levels of Omega-6 and Omega-3 (Linoleic Acid) and is a rich source of gamma-tocopherol. It provides lipid barrier protection and moisture retention to the skin and is a good skin conditioner with emollient properties.

**Ruby Extract** Designer Skin® exclusive ingredient often considered to be the color of love and passion, red is also the unmistakable color of Rubies. Used in holistic medicine, Rubies are thought to treat a variety of ailments. Powdered Rubies help gently and luxuriously exfoliate the skin.

**Saccharomyces Copper Ferment Extract** This ingredient is derived from a fermentation product of copper metabolically complexed with the cellular glycoproteins extracted from living yeast cells. Copper plays an integral role in the formation of keratin as it is produced in the epidermis. It is also key in the formation of tyrosinase, a precursor to tyrosine. See also Tyrosine.

**Saccharomyces Lysate Extract** This ingredient, in combination with Phospholipids, is produced by fermenting brewers yeast (Saccharomyces cerevisiae) in a nutrient media. The nutrient fermentation media is fortified with the specific cofactor minerals associated with protein production and general cell metabolism, copper and zinc.

**Saccharomyces Lysate Ferment** See Vitatan®.

**Saccharomyces/Gold Ferment** This ingredient contains gold that has been metabolically complexed with the cellular glycoproteins extracted from living yeast cells. Gold plays a key role in cellular protein production processes and has been linked with normal skin metabolism.

**Saccharomyces Officinarum Extract** See Sugar Cane Extract.

**Sacha Inchi Oil** Designer Skin® exclusive ingredient. This oil is carefully cold pressed from the seeds of the Sacha Inchi plant. This super skin conditioning oil is rich with Omega 3, 6 and 9, Essential Acids and Vitamin E, helping to moisturize skin and improve elasticity.

**Safflower Oil** This emollient plant oil is similar to all non-fragrant plant oils and is a known antioxidant used to moisturize the skin.

**Salicylic Acid** Helps clear blemishes; conditions skin, prevents future breakouts.

**Salix Alba Bark Extract** See Willow Bark Extract.

**Sandalwood Extract** This natural extract moisturizes dry skin and has a soothing scent that eases physical and mental tensions.

**Satin Base Blend** Designer Skin® exclusive blend helps to lock in hydration with a dry to the touch, silky after-feel. This technology allows the drops to be applied directly on skin for an immediate highlight or premixed into lotion for a subtle, all over glow.

**Savvy Seven™ California Tan® exclusive technology. Savvy Seven helps maximize tanning results by embracing seven core components to developing gorgeous color – Oxygen, Energy, Copper, Zinc, H2O, Electrolytes, Antioxidants. Each ingredient was selected with two key goals in mind, deliver amazing skin care and develop an amazing tan.

**Sea Algae** This marine antioxidant helps reduce the appearance of fine lines and wrinkles. 

**Sea Oak Algae** Grown on the cliffs of the North Sea, Baltic Sea, Pacific and Atlantic Oceans, Sea Oak and is known to help preserve youthful skin, improve skin’s smoothness and leave skin feeling nourished. It is rich in Vitamins A, B and C to help protect skin leaving behind a refreshed appearance.

**Seabuckthorn Oil (Hippophae rhamnoides oil)** A Eurasian maritime shrub with orange-red berries, sometimes used as a dye. Skin conditioning properties.

**Sea Kelp Extract** Rich source of minerals, Vitamin A and D and proteins; has anti-aging and firming properties;
helps in getting deep dark tan color.

**Sea Lettuce Extract (Ulva lactuca extract)** Rich source of minerals, Vitamin A and D and proteins; has anti-aging and firming properties; helps with keeping a deep-dark tan color.

**Sea Minerals** Help in reducing fine lines and wrinkles; possess several minerals governing cellular hydration; help in process of synthesis of collagen and elastin; known as a healing agent; possess Superoxide Dismutase, the natural trapper of free radicals; visibly increase skin tone and firmness.

**Sea Salt** This natural mineral is often found in scrubs and is used to gently exfoliate the skin to prepare for tanning, while refining skin and enhancing the moisture retention in the skin.

**Sea Salt Blend** Swedish Beauty’ exclusive ingredient. Contains the essential minerals Magnesium and Calcium that skin needs to function by restoring the top layer of skin. Magnesium generates amino acids as well as proteins for healthier skin, while Calcium controls cell turnover to regular skin and retain water for ultimate hydration.

**Sea Weed** Packed with minerals such as Iodone, Calcium, Magnesium and Potassium. The high mineral content in seaweed can help flush toxins from the body.

**Sesame Seed Oil (Sesamum indicum seed oil)** Skin-conditioning agent, carrier, emollient and lubricant. Rich in vitamins.

**Shea Butter** This fat obtained from the fruit of the karite tree is a skin-conditioning ingredient that is well-known for its skin-smoothing property. It helps protect and restore skin and is especially good for dry and sensitive skin types. Shea Butter is also known as Butyropermum Parkii.

**Shiitake Mushroom Extract** One of nature’s most powerful antioxidants, shiitake mushroom is also known for its anti-aging, anti-wrinkle and anti-viral properties. It is rich in proteins, amino acids, enzymes, and vitamins (A, B1, B2, D, E). Shiitake mushroom extract deliciously nourishes skin for delicious color results.

**Silica** This inorganic oxide acts as a gelling agent. Fumed silica will act as an emulsifying aid, thus promoting the suspension of oils and fragrances.

**Silicone Emulsion** Delivers a luxurious, unique sensory experience as it nourishes and moisturizes, leaving skin with a velvety-soft finish.

**Silk Amino Acids** Mixture of amino acids resulting from complete hydrolysis of silk. Skin-conditioning agent, anti-irritant, moisturizer.

**Silk Peptides (Hydrolyzed silk)** A mixture of proteins with unique property of regenerating cutaneous tissue. Enhances skin luminosity and radiance. Increases skin hydration, suppleness and significantly increases synthesis of collagen responsible for skin structure and skin repair process.

**Silver Birch Bark Extract (Betula alba bark extract)** Rich in phenolic compounds that are excellent antioxidants; skin soothing, refreshing and especially moisturizing for dry skin; helps calm inflammation.

**Simmondsia Chinensis Oil** See Jojoba Oil.

**Sincere Skincare Blend** Decadent combination of natural ingredients including Arugula, Velvet Bean and Mangosteen that enhance dark color by stimulating melanogenesis, providing L-Dopa (precursor to the tanning pathway) to maximize melanin production, while also nourishing the skin with powerful antioxidants that ensure a strong tanning canvas.

**Sinodor** Odor neutralizer derived from citronella.

**Sizzle Formula** Designer Skin® scientifically designed complex. Bronzing is achieved by stimulating the natural metabolism in the skin while enhancing skin tone. These bronzer-hybrids precondition the skin, producing pre-tanning and natural bronzing pigment. See Tingle.

**Skin Activated Moisture™ Technology** Designer Skin® scientifically designed skin conditioning blend of humectants and emollients melt at skin temperature to give a sensually smooth feel, while helping protect skin from environmental insult and seal in moisture.

**Skin-firming Peptides** A heating formula that combines three tingle ingredients to deepen the dark color expected from a tingle without the uncomfortable after feel.

**Skin Guardian™ Complex** A natural botanical-based DNA protector extracted from the leaves of the candle tree. Allows skin to appear fresh, smooth and more radiant.

**Skin Repair Blend** Combination of exotic berries from Australia, including DieMEN Pepper, which nourishes the skin intensely while providing regenerative effects to protect the skin against oxidative damage, helping to repair and improve the appearance of tough skin.

**SkinRX** This exclusive California Tan® ingredient infuses stressed skin with calming, revitalizing nutrients and boosts skin endorphins for refreshed, rejuvenated skin.

**Skin Saver** This complex feeds skin a combination of ingredients that reduce stress, inflammation and dehydration while replenishing essential hydration, nutrients, and energy. In addition, it delivers tan accelerating ingredients to help skin perform more efficiently as it develops a healthy-looking tan. It also acts as an antioxidant.

**SkinSoak™ Moisture Blend** Uses a combination of Hemp, Oatmeal and Honeydew to provide the skin with intense hydration.

**Skin Reviver Technology** Splendid combination of lavish anti-aging ingredients that help keep skin hydrated, toned and rejuvenated, giving it a luminous youthful glow, while also helping to decrease the appearance of oil on the skin resulting in smooth, even skin tone.

**Skin Therapy Blend** Helps rejuvenate and replenish energy in skin, leaving skin radiant and healthy.

**Skin Tonic Technology** Found only in the California Tan Sunless’ Color Perfecting Complex’ Instant Sunless Spray, a technology that helps block fat storage by preventing pre-adipocytes from becoming mature adipocytes, aka fat cells, giving a more slimmed appearance.

**Skin Vitality No. 9** Designer Skin® exclusive technology refined with powerful skin protectants and conditioning agents to help ensure skin is left smooth and soft. Energizing and revitalizing ingredients work to bring life back to skin.

**SkinDew™ Bronzing Complex** High-level of DHA and DermaDark® are flawlessly blended with humectants that help deliver the bronzers to the skin for a powerful color effect, while also strengthening and restoring moisture for prolonged dark color on smooth, soft
**Skinny Sugar** Designer Skin® exclusive technology known to help in the breakdown of fats and attract moisture; aiding in the appearance of tone, radiant and glowing skin.

**SMART Technology** California Tan® exclusive technology that identifies the skin’s needs and delivers the Savvy Seven ingredients across the skin where they are needed to ensure dark tanning performance.

**Smooth & Tone Technology** Proprietary ingredient helps support and maintain skin tonicity while revitalizing and giving a more vibrant and dewy appearance. Also helps to reduce skin imperfections, leaving the skin smooth and soft.

**Sodium Hyaluronate** This ingredient is the sodium salt of Hyaluronic Acid. Hyaluronic acid is a polysaccharide of the glycosaminoglycan family. Along with collagen, elastin and proteoglycans, it builds up the skin dermis. Sodium Hyaluronate helps improve skin moisture, elasticity and firmness.

**Sodium PCA** Sodium salt of PCA (pyrrolidone carboxylic acid). Humectant, emollient and emulsifier, foam forming agent. Also found in human skin and responsible for its moisture-binding capacity.

**Soft Touch Exfoliation** Designer Skin® exclusive technology gently refreshes skin to maximize even, flawless results while working to extend the life of your sunless color.

**Sorbitol** Absorbent, binder, humectant.

**South African Rooibos Red Tea Extract** Contains more than 100 antioxidants, including alpha-hydroxy acid and zinc, promoting healthier looking skin. Fights free radicals while maximizing collagen production. Calming and soothing properties for sensitive skin.

**Soy Protein** This protein helps develop firmer-looking skin.

**Spearmint Oil (Menth viridis leaf oil)** Volatile oil obtained from the dried tops and leaves of Mentha Viridis. Fragrance ingredient, stimulant and anti-Septic.

**Special Occasion Bronze®** Designer Skin® exclusive bronzing complex contains concentrated DHA to deliver results that gradually darken and Caramel for an immediate bronze.

**Spirulina Maxima** This naturally occurring blue-green algae is packed with an array of nutrients. It is known to help smooth, protect skin barrier function, and provide skin hydration.

**Squalane** A saturated chain hydrocarbon that gives great moisturizing and film-forming benefits to skin.

**St. John's Wort Extract** Increases microcirculation, energizes skin for optimal color results.

**Stargaze Flawless Finish** Designer Skin® exclusive technology providing a smooth appearance as microscopic silicone particles help fill in wrinkles and diffuse light for a matte finish. The appearance of fine lines and skin imperfections are reduced for a soft, youthful look.

**StayFresh Technology** New advanced Australian Gold® technology that eliminates ATO (after-tan-odor). This system inhibits and neutralizes odors. Triclosan-free.

**Stearic Acid** This fatty acid is used as an emulsifying agent in cosmetics.

**Stearyl Alcohol** Fatty alcohol. A surfactant, emulsifier, emulsion stabilizer, emollient, foam booster and viscosity increasing agent.

**Stimutan Heat Complex** Australian Gold’s® signature blend of tingle made with Benzyl Nicotinate, which stimulates blood flow to the skin, making the pigment darker and producing immediate results.

**Strawberry Extract** Powerful antioxidant which helps prevent collagen destruction and provides the skin with nourishing nutrients for healthy, smoother skin and is an excellent source of Vitamin C.

**Strobing Diamonds** Designer Skin® exclusive blend of diamonds and soft golden glow pigments that help to brighten appearance, diminish the look of fine lines and provide a golden highlight to skin.

**Sugar Baked Blend** Designer Skin® exclusive blend of sugars and moisturizers that help to enhance tanning results. Sugars are naturally excellent at attracting water to skin, working to keep it moisturized. Our sugar blend is activated by the heat during tanning, designed to help skin hydrated as pores open, working to seal in moisture for lasting hydration.

**Sugar Cane Bronzers** This natural sunless tanning ingredient gives an immediate boost of color in 2-4 hours.

**Sugar Cane Extract** Juice from the stem of Sugar Cane contains silicon, potassium, magnesium, phosphoric acid, saccharose and glycolic acid. Its extracts are used for skin smoothing and moisturizing benefits.

**Suma Extract** Contains 19 different amino acids, a large number of electrolytes, trace minerals, iron, magnesium, zinc, Vitamins A, B1, B2, E, K and pantothenic acid. Used as an aphrodisiac and to help reduce muscle fatigue.

**Sumptuous Silicone Blend** Designer Skin® exclusive blend of silicones that promote silky, soft skin with an unparalleled after feel. Helping to lock in moisture, this advanced lightweight blend hydrates to leave skin with the look and feel of pure luxury.

**Sunflower Oil** This oil is expressed from the seeds of the sunflower, also known as Helianthus Annuus. It is a natural triglyceride with superb oxidative stability and emollient properties, and is often used as a skin-conditioning agent.

**Sunflower Seed Oil** This oil is expressed from the seeds of the sunflower, also known as Helianthus Annuus. It is a natural triglyceride with superb oxidative stability and emollient properties and is often used as a skin-conditioning agent.

**Sunspot Corrector** Designer Skin® exclusive ingredient naturally even the tan, while working to reduce the appearance of sunspots and the uneven color they leave behind.

**SunStay Technology** Designer Skin® scientifically designed complex blend. Activated Amino Acid (AAA) system that interacts with skin to provide a youthful skin condition, to intensify color results and extend bronzer effects. Rich in trace elements for intensified color. Increases skin’s hydration and controls moisture flux at the cellular level. Maintains skin moisture and balance to keep the upper layers of skin from dehydrating and provides nutrients to prolong bronzer effects.

**Super Oxide Dismutase** This mixture of metalloenzymes found in aerobic cells is used as an extremely effective antioxidant.
2020 Ingredient Glossary

**Super Vitamin E** See Tocopheryl Acetate, See Tocotrienols.

**Sweet Almond Oil** This ingredient is the fixed oil obtained from the ripe seed kernel of Prunus Amygdalus Dulcis. Commonly known as Sweet Almond Oil, it is made by pressing the kernels from both sweet and bitter almond trees. Unlike the essential oil, this fixed oil does not contain any benzaldehyde or prussic acid and is an excellent skin softener, conditioning and moisturizing skin to prepare it for brilliant dark color development.

**Sweet as Sugar Elixir** Designer Skin® exclusive soothing blend of Milk, Cane Sugar and Allantoin helps to leave skin soft and attract water to ensure skin is left moisturized.

**Sweet Temptation Complex** Designer Skin® exclusive blend features Pear Extract and Caffeine to help fortify and energize for a more youthful looking appearance.

**TanStart ™ Vitamin Blend** Designer Skin® scientifically designed complex helps Melanin production and distribution for a darker glow.

**TanFresh ™ Blend** Delivers a fresh, invigorating after-tan fragrance.

**Tanning Optimizers** Release bronzing ingredients over time, enhancing the darkening effect after tanning.

**Tanositol™ (D-Chiro-inositol)** Designer Skin® scientifically designed complex prompts additional results during the delayed phase of UV exposure.

**TanFresh ™ Vitamin Blend** Swedish Beauty® exclusive ingredient. A proprietary blend of Cocoa, Orange Peel and Vitamin E helps ensure even color and smooth, healthy skin; all while helping to activate and promote deep, rich color.

**Taurine** An amino acid that works as an osmoregulatory controller and mineral transporter. In Coast, Taurine’s affinity with minerals helps protect skin from environmental aggressors.

**Tea Tree Oil (Melaleuca alternifolia leaf oil)** Essential oil obtained from the leaves of Tea Tree. Antioxidant, anti-inflammatory, anti-bacterial and germicide. It penetrates skin and heals quickly. Fragrance ingredient.

**Tektonic Technology®** Increases and replaces epidermal stem cells for more youthful looking skin.

**Ternifolia Seed Oil** This is the Latin name for Macadamia Seed Oil. See Macadamia Seed Oil.

**The Palm Collection™ Blend** Utilizes a California Tan® exclusive nutrient absorption technology to provide advanced skincare and tanning results for a gorgeous, island-inspired glow.

**Theobroma Cacao** See Cocoa Butter.

**Theobroma Cacao Extract** See Cocoa Extract.

**Thermus Thermophilus Ferment** This thermo- and UV-stable ingredient, derived from deep sea water, has enzymatic activity that increases with higher temperatures. It is a very potent antioxidant and helps repair UV-damaged skin cells.

**Thyme Extract** Rich in flavonoids; molecules act as antioxidants, neutralizing free radicals, soothing and toning skin. Antibacterial, anti-inflammatory and analgesic activities; providing calming properties to the skin.

**Timeless Youth Elixir** Superb blend of amazing ingredients that are specially designed to help increase skin toning and help to fight against fine lines and wrinkles for a youthful complexion.

**Time Release Bronzers** Release bronzing ingredients over time, enhancing the darkening effect after tanning.

**Time Release Fragrance** Designer Skin® exclusive specially encapsulated fragrance technology helps anchor fragrance to skin’s surface for a long-lasting effect.

**Tingle** For advanced clients who like to see immediate and intensified color. Increases micro-circulation and oxygenation of the skin resulting in darker color. See Sizzle Formula.

**Titanium Dioxide** When combined with Mica, this silicate mineral is used as a colorant in products. Though both silicate minerals vary in chemical composition, they have similar physical properties.

**Tocopherol** See Vita C & E Renewal Factor.

**Tocopheryl Acetate** Also known as Vitamin E Acetate, this antioxidant helps block lipid peroxidation in cells and tissues. It will help neutralize free radicals to prevent and diminish fine lines and wrinkles, while it also softens skin and moisturizes from within.

**Tocotrienols** Is used as an antioxidant and anti-inflammatory agent. The antioxidant activity of Tocotrienols is 40-60 times higher than tocopherols.

**Toning and Rejuvenating Blend** Swedish Beauty® exclusive ingredient. Caffeine, known for its ability to help break down fat, is combined with Allantoin, known to help rejuvenate skin, to promote a healthy and soft complexion.

**TRF™** This exclusive and boosted California Tan® ingredient increases the elasticity, healthy appearance and general well being of skin. Tissue Respiration Factors (TRF) have excellent moisturization qualities and promote oxygen intake in the living cells, while also enhancing collagen production and the development of a deep, dark tan.

**Triple Bronzing Boost™** Designer Skin® exclusive ingredient that provides skin with instant cosmetic color that can deepen during and after tanning for the most drastic immediate color results possible.

**Triple Moisture Sensation** A blend of ingredients found in California Tan Sunless® products that locks in moisture, triggering a hydration that reaches deep into skin providing intense moisturization and gives skin a healthy looking appearance.

**Tropical Heat** This exclusive Emerald Bay® complex increases micro-circulation in the skin, stimulating a flush of crimson color and warmth.

**Tropical Hemp Blend** See Hemp Seed Oil.

**Truffle Tyrosinase®** This incredible bronzing agent jump starts the process earlier by “cheating” and by-passing initial steps in the tanning process. It increases melanin synthesis by building extra melanin and enhances even melanin distribution.

**Turmeric Extract** This common household spice is high in minerals and vitamins, especially Vitamin C. The extract is a yellowy-orange liquid which can impart...
color in a product. This ingredient has antioxidant, anti-inflammatory and skin-stimulating properties. **Tyrosilane** Designer Skin® scientifically designed complex triggers and deepens color by activating melanin production. **Tyrosine** A biosynthetic use of this amino acid is the production of melanin in the human skin.  **Tyrosine Derivatives** Intensifies and strengthens color initiated by tyrosinase. **Tyrostan** This water soluble form of Tyrosine helps stimulate melanin production when exposed to UV light. **Ubiquinone** Contains natural antibacterial properties, and moisturizing agents help provide younger, firmer-looking skin with a matte finish.  **Vanilla Extract** Contains natural antibacterial properties, which help to cleanse the skin. It also contains powerful antioxidants that help prevent the skin from harmful effects of environmental oxidation; through this mechanism helps reduce the signs of aging and acts as a pore refiner. **Velvet Blur Finish** Designer Skin® exclusive technology works to promote a smooth, flawless look as minerals and moisturizing agents help provide younger, firmer-looking skin with a matte finish.** Violet** Helps to impart softness on the skin. **Virgin Hemp Seed Oil** See Hemp Seed Oil. **Vita C E Renewal Factor** This ingredient technology releases active compounds, such as Vitamin C and Vitamin E and is capable of proliferation of anti-free radicals when subjected to UV light. It is also a strong antioxidant and helps prevent the production of lipoperoxides, which damage the skin barrier layer when subjected to UV stress. **Vitamin A** This antioxidant vitamin helps neutralize free radicals. **Vitamin A Palmitate (Retinyl Palmitate)** Ester of Retinol (Vitamin A) and Palmitic Acid. More stable to oxidation than Vitamin A itself. Antioxidant, skin-conditioning agent, free-radical scavenger. Helps in growth of epithelial cells, maintains structures and normal functions of the skin and protects it against external aggressions. **Vitamin B** This antioxidant vitamin helps neutralize free radicals.  **Vitamin B2** (Riboflavin) Riboflavin is a factor in the Vitamin B complex and is used in emollients. It is necessary for healthy skin and respiration. **Vitamin B3** This antioxidant vitamin is known to help balance uneven skin tone for beautiful and nourished skin, while also helping protect from external aggressors for a smooth appearance. **Vitamin C** This antioxidant vitamin helps neutralize free radicals. **Vitamin Cocktail** This mixture of ingredients helps to protect skin from photo-aging. Vitamin Cocktail also nourishes, tones, scavenges free radicals and prevents irritation. It contains high concentrations of Vitamin A, Vitamin C, Pro-Vitamin A and Vitamin E. **Vitamin D** This is one of the body’s fundamental vitamins needed for survival and cannot be present without the assistance of UV light. **Vitamin D2 (Ergocalciferol)** Skin healing properties; supports collagen production and skin-integrity. Absorbed topically and is fat soluble.  **Vitamin E** Vitamin E is also known as Tocopheryl Acetate, an antioxidant that helps block lipid peroxidation in cells and tissues. It will help neutralize free radicals to prevent and diminish fine lines and wrinkles, while it also softens skin and moisturizes from within. **Vitapan** This exclusive California Tan® ingredient aids in enrichment of the skin’s biological composition through nutrient supplementation. It moisturizes and energizes the skin so that it can efficiently deal with the tanning rays in sunlight or artificial UV light to rapidly build a base tan. Vitatan® helps prevent the skin from drying out and allows an even tan to develop by providing a package of “complementary” nutrient moisturizers and activators that are normally present in the skin. **VitaPlus Blend** Designer Skin® scientifically designed complex to help hydrate skin, reduce irritations, prevent fine lines and improve skin color and elasticity. **Vitis Vinifera Oil** See Grape Seed Oil. **Volcanic Ash** A light, exfoliating ingredient that will polish away impurities and remove dull, dry skin. **Walnut Extract** This is a natural bronzing agent. **Walnut Shell** Large particles that provide gentle yet effective exfoliation to smooth skin and is also rich in antioxidants to help protect skin. **Water** Also known as agua and eau, has amazing skin conditioning and dispersing properties. The water used in our products is purified to ensure metallic ions and any other impurities are removed. **Water Color Technology** California Tan Sunless® exclusive technology that is designed to affix rich color and moisture to the skin. The natural colorants infuse and highlight features while a hydrating blend of White Lotus Essential Water, Coconut Water and Eucalyptus Water moisturize skin. **Water Infusion Technology** California Tan® exclusive blend. Revered for its special properties to help saturate skin in moisture. Water Lily is high in phenolic content and acids that help provide nutrients to the skin, leaving behind a glowing appearance. Tamanu Oil is used frequently in Polynesia and Southeast Asia because it is high in antioxidants. **Water Lily Extract** This flower extract contains Vitamin C and minerals, such as calcium and potassium. It is renowned for softening, astringent and moisturizing properties and is often used in sunburn preparations. **Wheat Extract** This natural extract moisturizes while creating a smooth, even-toned tan. **Wheat Sprout Extract** (Triticum vulgare sprout extract) It is a vegetal DNA extracted from wheat germ; used for stimulating properties and more particularly for the treatment of stressed and injured skin for healing and cellular restoration; DNA has water retention.
properties and thus excellent for tanning products where loss of water is significant; has antioxidant properties and provides a protective action against impairing phenomenon and solar radiation; DNA provides anti-elastase activity, thus taking care of UV damage (inflammation) to the skin; and effectively acts as a powerful free radical scavenger by scavenging Superoxide Anions created after UV exposure, thus stops the degradation of connective tissues due to radical attacks which appear with aging or photo aging.

White Birch Bark Skin rejuvenating, refreshes and nurtures skin, renewing activity while smoothing the appearance of the skin.

White Tea Extract (Camellia sinensis leaf extract) Grown in high mountains of Fujian province in China. Very strong antioxidant properties and free radical scavenger.

White Willow Extract Botanical antioxidant helps heal burns and soothes skin inflammations.

Wildberry Wildberry is celebrated for its healing and antibacterial qualities by containing astringent properties that help clarify and improve texture of the skin. Its fruit acids, plus a high concentration of Vitamin C also help balance color for flawless, radiant results.

Wild Cherry Bark Extract (Prunus serotina bark extract) Highly rich in phenolic compounds and flavonoids; carries anti-aging and anti-free radical properties; skin soothing and healing agent.

Wild Indigo A perennial flower that features blue-purple petals that can assist in making colored dyes.
